Following the successful completion of the previous Strategic Plan

REPSOL UNVEILS ITS 2016-2020 STRATEGIC PLAN: VALUE AND RESILIENCE

- **The 2016-2020 Strategic Plan guarantees Repsol's strength and ability to create value even with low oil prices.**

- **The company's increased size and improved makeup, following the achievement of the 2012-2016 strategic plan's goals and the transformative integration of Talisman, allow Repsol to extract value from that growth to increase efficiency and resilience and take advantage of the opportunities that arise from the energy environment.**

- **To meet its value-creation objective under any price scenario, the company will focus on efficiency and asset portfolio management.**

- **Repsol's demonstrated ability to create value will allow the company to finance its own development, reduce debt, and maintain a competitive shareholder compensation. The dividend yield is among the highest on Spain's Ibex-35 stock market index.**

- **After a period of growth culminating in the purchase of Talisman, the 2016-2020 Strategic Plan will implement a series of initiatives which aim to double EBITDA (at CCS) to 11.5 billion euros.**

- **The plan includes an ambitious efficiency program with specific actions and commitments (some of which are already implemented) with which it will obtain 2.1 billion euros a year of savings and synergies.**

Communication Executive
Managing Division
Tel. (+34) 91 753 87 87
www.repsol.com
prensa@repsol.com

- **With the integration of Talisman, Repsol has incorporated high quality assets that require less investments, maintaining a stable production and a reserve replacement ratio of about 100%.**

- **The flexibility, strength, and adaptability of its asset portfolio will allow Repsol to undertake divestments of 6.2 billion in non-strategic assets and cut spending by 38% without altering its company profile.**

- **The efficiency in the Downstream unit (Refining, LPG, Marketing, Chemicals, and Gas & Power), improved with investments in refineries in Cartagena and Bilbao, places Repsol at the head of European integrated companies in efficiency, value creation, and resilience.**

- **The plan includes a broader integration of refining and marketing activity, with divestments in non-strategic assets and a clear goal of reducing energy costs and CO_2 emissions.**

- **“We are presenting a Plan with a clear vision, and measurable commitments. This plan not only shows our solidity and resilience, but also how far we can go in terms of creating value and strength for our company,” said Repsol CEO Josu Jon Imaz.**

Repsol today presented its 2016-2020 Strategic Plan, with which the company enters a new phase in which it will extract value from the growth achieved after achieving the targets set in its previous Strategic Plan.

The company has achieved a new scale and makeup after the transformative growth resulting from acquisition of Talisman that has greatly increased the flexibility to take decisions, with a high-quality asset portfolio focused on more stable OECD countries.

To meet the value-creation objectives from the 2016-2020 Strategic Plan under any circumstances and to increase its resilience, the company will focus on efficiency and asset portfolio management.

The Plan is based on Repsol’s demonstrated ability to create value from management efficiency, even with low oil prices. This will allow the company to be self-financed, maintain its competitive shareholder compensation, and reduce its debt.

The Talisman acquisition, which was completed in May, concluded the execution of the previous Strategic Plan and afforded Repsol a scale that is ideal to take on this new chapter.

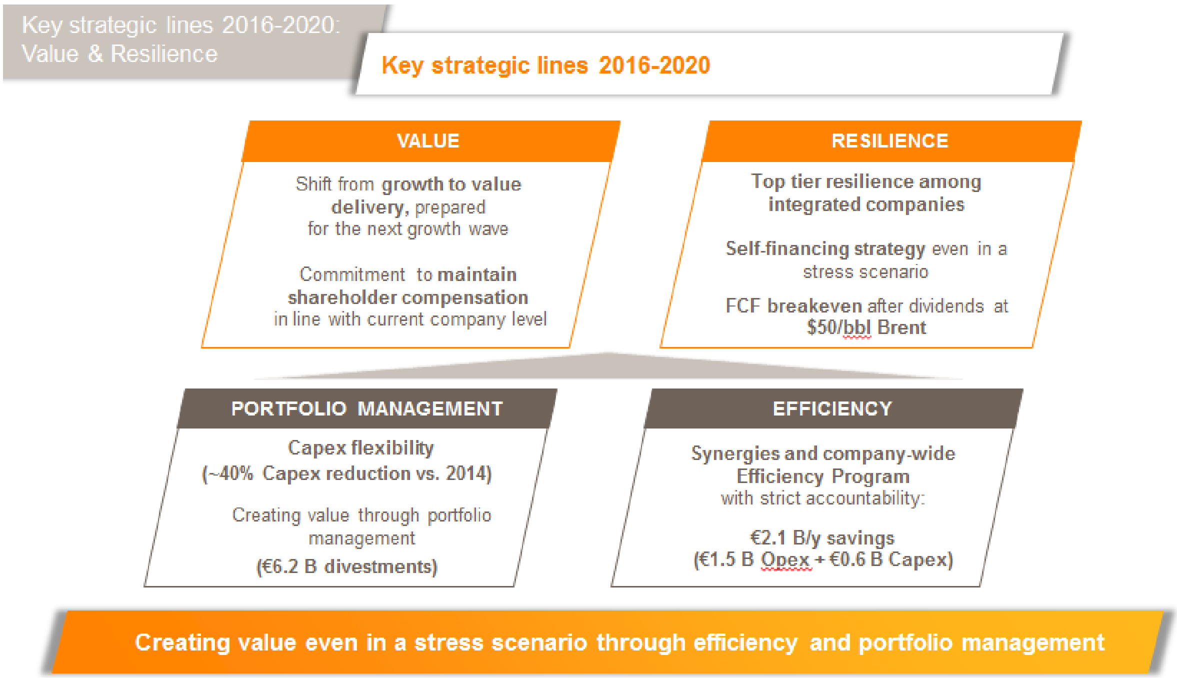
www.repsol.com
prensa@repsol.com



Value and Resilience, the basic lines that define the Strategic Plan, are supported by asset portfolio management and the maximization of efficiency.

This will allow Repsol to double its EBITDA at CCS to 11.5 billion euros in 2020.

The flexibility, strength, and adaptability of its asset portfolio will allow Repsol to undertake divestments of 6.2 billion in non-strategic assets and cut spending by 38% without altering its company profile.

Along with lower investment, asset portfolio management will allow for divestments of 6.2 billion euros between 2016 and 2020, half of which will be executed in the next two years.

Furthermore, five months after the Talisman integration, new synergies have been identified that allow Repsol to raise its savings target resulting from the integration to 350 million dollars from the 220 million dollars initially expected.

These synergies supplement the efficiency program included in the Strategic Plan. This program will be applied to the entire company and will lead to cost savings, including synergies, of 2.1 billion euros per year from 2018.

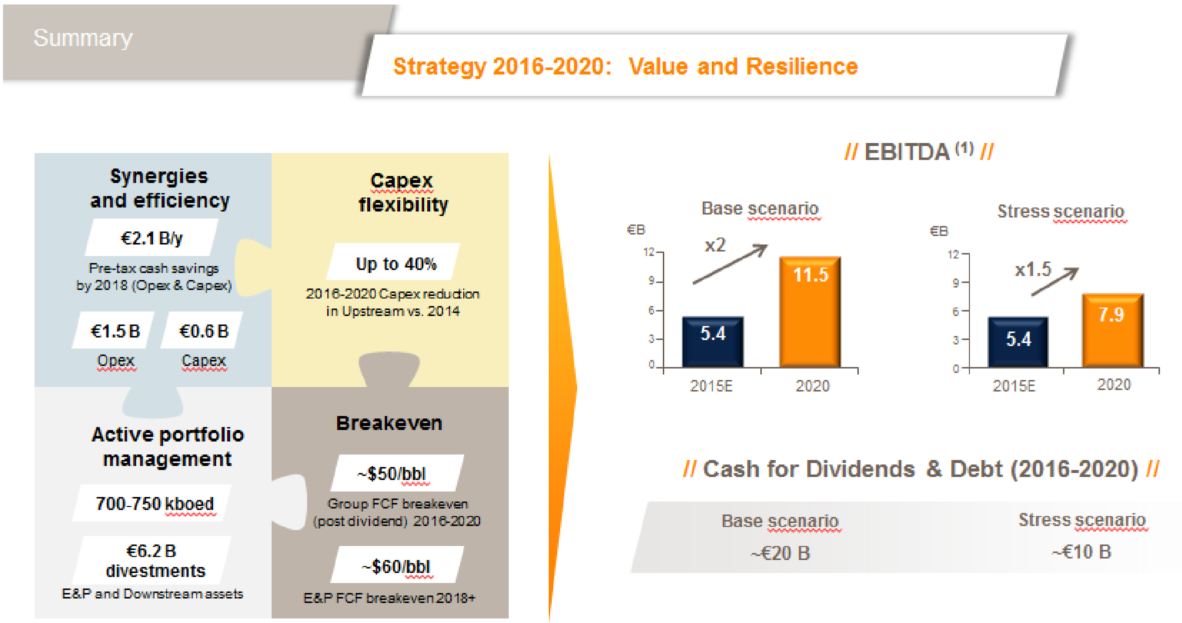
prensa@repsol.com

Commitment to dividends and rating

One of the core aspects of the 2016-2020 Strategic Plan is a commitment to the shareholder compensation policy, one of the best dividend yields on Spain's Ibex-35 index. Repsol allocates one euro per share and distributes this as scrip dividends.

Dividend payment will be possible throughout the entire period contemplated in the strategic plan, even with crude prices remaining at 50 dollars per barrel for the duration. At that Brent price, Repsol will be able to generate cash flow to finance its investment needs, maintain dividends, and pay off debt. Furthermore, it will be able to maintain its investment grade rating.



1. EBITDA at CCS (Current Cost of Supplies.)

Optimal Upstream size

Following the Talisman acquisition, Repsol's Exploration and Production unit will focus on three strategic regions: North America, Latin America, and South-East Asia, with high potential for organic development.

From this starting point, the Strategic Plan sets out a process of optimization and asset portfolio management that will reflect lower exploration expenses, a reduction of 40% in investment levels, and production of between 700,000 and 750,000 barrels of oil equivalent per day, guaranteed by current reserves.

All of this will allow this business area to reduce the free chasflow breakeven price. This will generate positive cash flow along with an increase in ROACE.

Communication Executive
Managing Division
Tel. (+34) 91 753 87 87
www.repsol.com
prensa@repsol.com

Downstream strength

Greater efficiency in the Upstream area will be complemented by the demonstrated strengths of the Downstream area which have reaffirmed Repsol's advantages as an integrated company.

The investments made in the Cartagena and Bilbao refineries and the corresponding improvement in integrated refining margins have placed Repsol at the head of European integrated companies in efficiency, guaranteed value creation, and resilience in the face of depressed oil prices.

The Strategic Plan includes a broader integration of refining and marketing activities, with divestments in non-strategic assets for the Downstream unit and a clear goal of reducing energy costs and CO_2 emissions. This allows the company to set the Downstream unit's target for free cash flow generation for the next five years at an average of 1.7 billion euros per year.

Summary

Repsol 2020

- Fully-integrated business model
- World-class explorer
- Optimized Upstream portfolio focused on core areas and play types
- Technical capabilities (unconventionals, operatorship…)
- Tier 1 Downstream
- Technology and know-how
- Safety & sustainability
- Highly-committed and talented workforce
- Track record of dealing with complex environments
- Highly efficient and resilient company
- Increasing earnings
- Sound financial position

…and as always…delivering on our commitments

Repsol 2020: Leaner and more competitive

Summary

2012-2015 Milestones

2012-2016 Strategic Plan: Growth and Delivery

2012	2013	2014	2015
YPF expropriation	LNG business divestment	YPF settlement and full monetization	Talisman Acquisition
Cartagena & Petronor refineries upgrade	Start-ups: Carabobo and Sapinhoa	New CEO appointment	Hybrid bonds issuance
Discoveries: Pão de Açucar and Sagari	Discoveries: Brazil, Alaska and Russia	Discoveries: T&T and Gulf of Mexico	Start-up: Perla
Start-ups: Margarita & Mid Continent		Start-up: Kinteroni	
		Extraordinary dividend	

2012-2016 Strategic Plan targets achieved

		// Targets //	// Delivery //	
High growth in Upstream	• Upstream as growth engine	CAGR>7% Prod 2016 ~500 kboepd	>25%/y (1) ~650 kboepd	✓
	• Reserves Replacement	RRR > 120%	190% (2011-2014)	✓
Maximize Downstream profitability	• Maximize profitability and cash	€1.2 B/y	€1.3 B/y (2)	✓
	• Fully-invested assets	€0.7 B/y	€0.7 B/y (2)	✓
Competitive shareholder compensation	• Competitive pay-out ratio	Stable dividend of €1/share	~€1/share per year (3)	✓
	• Dividend ~ €1/share		Extraordinary dividend in 2014	✓
Financial strength	• Self-financed plan	Self-financed	Leverage increase (Talisman acquisition)	✓
	• Commitment to maintain investment grade	Maintain investment grade	Achieved	✓

1. 25% CAGR estimated with 2015 production of 650 kboed (average daily production with Talisman integrated all year). Organic growth with a CAGR of ~7% excluding Lybia's impact (3% with it).
2. Downstream figures do not include any LNG business figures.
3. Dividend paid of €1/share every year with scrip dividend option. Extraordinary dividend of €1/share paid in 2014 after YPF agreement compensation.

Repsol today

An integrated company operating across the entire value chain

REPSOL

~2.2 billion boe proved reserves

Integrated business model

Tier 1 Downstream

Strategic Plan 2016-2020: Agenda

2012-2016 Strategic Plan delivery

Key strategic lines 2016-2020: Value & Resilience

Financial outlook

Summary

Key strategic lines 2016-2020

REPSOL

VALUE

Shift from **growth to value delivery,** prepared for the next growth wave

Commitment to **maintain shareholder compensation** in line with current company level

RESILIENCE

Top tier resilience among integrated companies

Self-financing strategy even in a stress scenario

FCF breakeven after dividends at **$50/bbl Brent**

PORTFOLIO MANAGEMENT

Capex flexibility
(~40% Capex reduction vs. 2014)

Creating value through portfolio management
(€6.2 B divestments)

EFFICIENCY

Synergies and company-wide Efficiency Program with strict accountability:

€2.1 B/y savings
(€1.5 B Opex + €0.6 B Capex)

Creating value even in a stress scenario through efficiency and portfolio management

Scenario assumptions

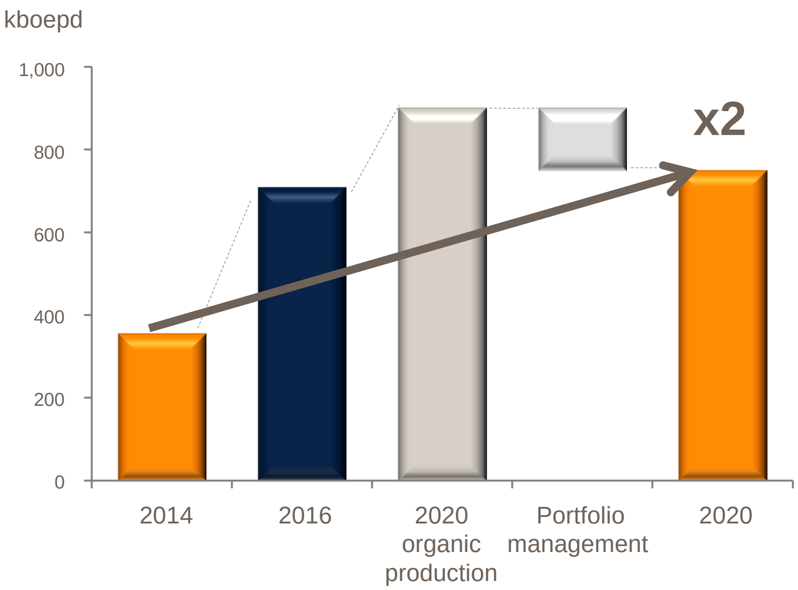
Stress scenario 2016-2020

Brent price	Henry Hub price	Repsol refining margin indicator
$50/bbl flat	$3.5/Mbtu flat	$6.4/bbl flat

Base scenario 2016-2020	2016	2017	2018	2019	2020
Brent price ($/bbl)	65.0	75.0	85.0	90.0	91.8
Henry Hub price ($/Mbtu)	3.5	4.0	4.6	4.7	4.8
Repsol refining margin indicator ($/bbl)	←		6.4		→

Shift from growth to value

// Upstream production evolution //

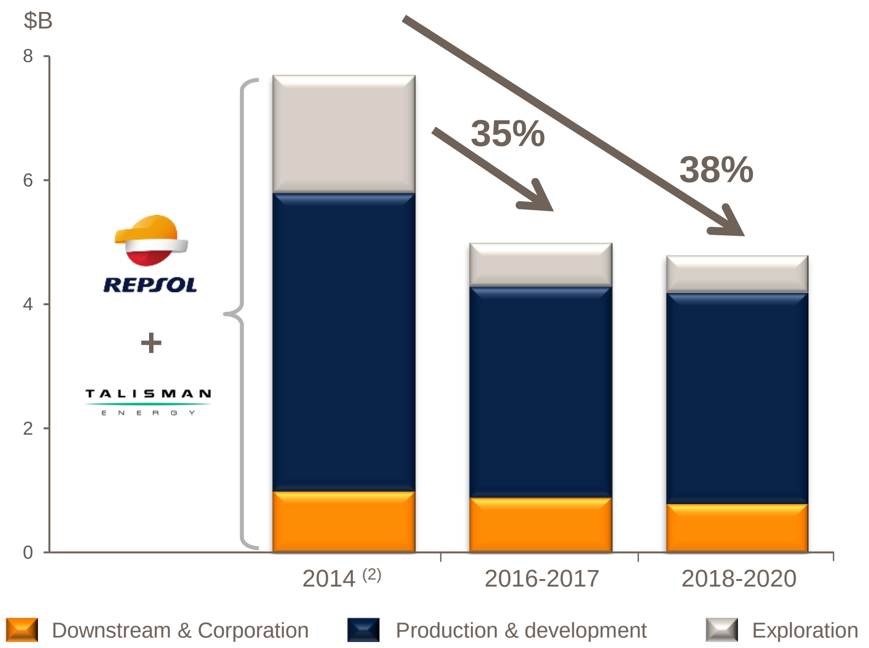


- Achieved critical mass in E&P business
- Extensive portfolio of assets and development projects
- Optionality to improve portfolio value by divestments

Achieving optimal size and portfolio mix

Capex reduction as a key lever

// Group annual Capex (1) //



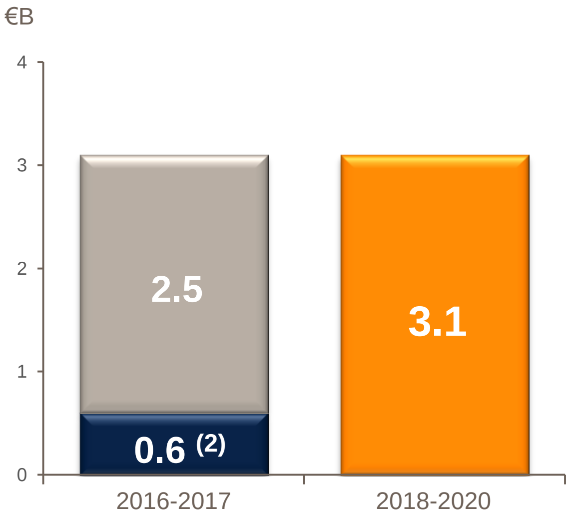
- Upstream assets in an advanced stage of investment
- Limited presence in capital-intensive new developments
- High share of unconventionals (price responsive Capex)
- Investment portfolio prioritization after Talisman integration
- Exploration with limited commitments
  - Expense (3) reduced from ~$2.1 B/y (2011-2014) to ~$0.9 B/y (2016-2020)
- Low Downstream capital requirements

High flexibility to manage investments

1. All figures in dollars using an exchange rate of $/€ 1.1 for the whole period. Capex does not include G&G and G&A from exploration, includes efficiency program.
2. Repsol and Talisman were two separate companies in 2014. In 2015 there are effects of the combined company. Figures include proportional share of JVs.
3. Exploration expense includes G&G and G&A.

Enlarged portfolio allows divestments

// Asset divestment plan of €3.1 B in 2016-2017 and €3.1 B in 2018-2020 //



✓ **€1 B in divestments commitment, after Talisman acquisition, fully achieved** [1]

✓ **Finding natural owners of assets willing to pay full value**

- 2015 CLH and piped LPG divestments

✓ **Sales focus on assets not linked to oil prices, subscale and high-cost/ high-breakeven positions to improve portfolio value**

- With time flexibility to sell at right price

Creating value and strengthening balance sheet

1. Sale of CLH and piped LPG in 2015.
2. Sale of piped LPG to generate €0.7 B (€0.1 B in 2015 and €0.6 B to be accounted for 2016.)

Synergies and Efficiency Program to reach €2.1 B/y in 2018

Strict accountability on Efficiency Program delivery for the management team

REPSOL

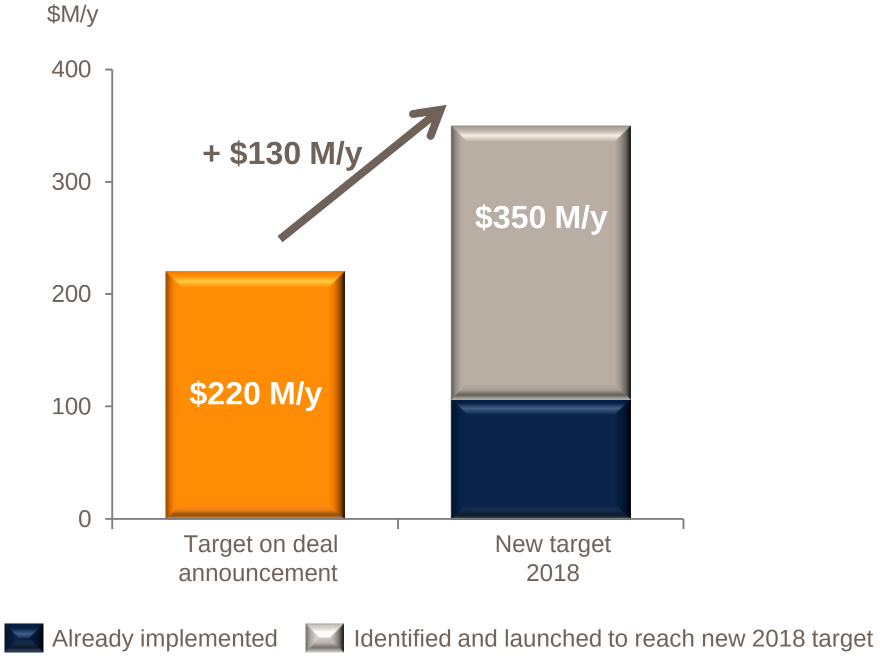
		// 2018 Opex impact //	// 2018 Capex impact //
Synergies	• Savings from combining the organizations • Benefits from enhanced portfolio • Other savings	€0.3 B	
Upstream Opex & Capex efficiency	• Capture of cost deflation • Efficiency improvement • Cultural change	€0.5 B	€0.6 B
Downstream profit improvement and efficiency	• Integration value maximization • Operational optimization • Reliability of industrial facilities	€0.5 B	
Corporation right-sizing	• Optimization of key support functions • Simplification: focus on value creation	€0.2 B	
		€1.5 B	**€0.6 B**

New Efficiency Program (Upstream, Downstream, Corporation)

50% of Opex savings already under implementation
Reduction of 1,500 Group employees already announced

Synergies from Talisman integration are already being delivered

// Integration synergies //



// Selected examples //

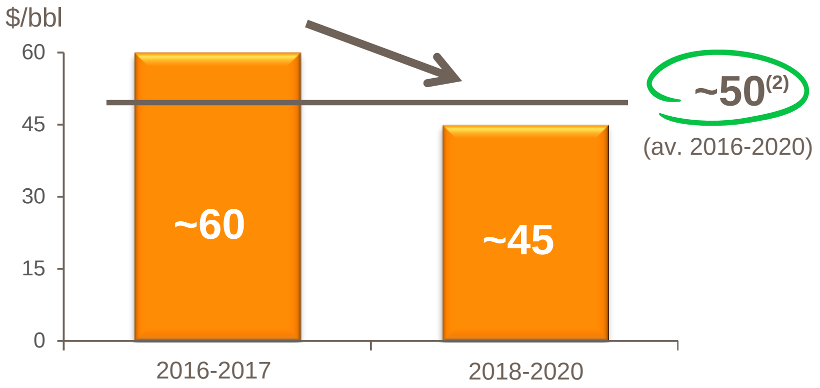
- Workforce and contractors reduction from overlaps
- Removal of duplications in general services, helpdesk support, communications, office events, etc.
- Removal of duplicate boards/committees and external services
- Cost of debt savings from joint financial optimization
- Improved liquids commercialization from Talisman production using Repsol trading capabilities

>30% of synergies already implemented

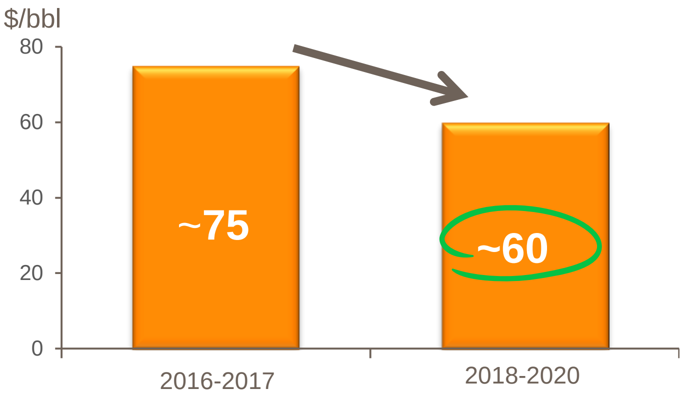
New synergies target of $350 M/y by 2018
(Raised from $220 M/y at the time of the acquisition announcement)

Breakevens

// Group FCF breakeven (1) after dividends //



// Upstream FCF breakeven (1) //

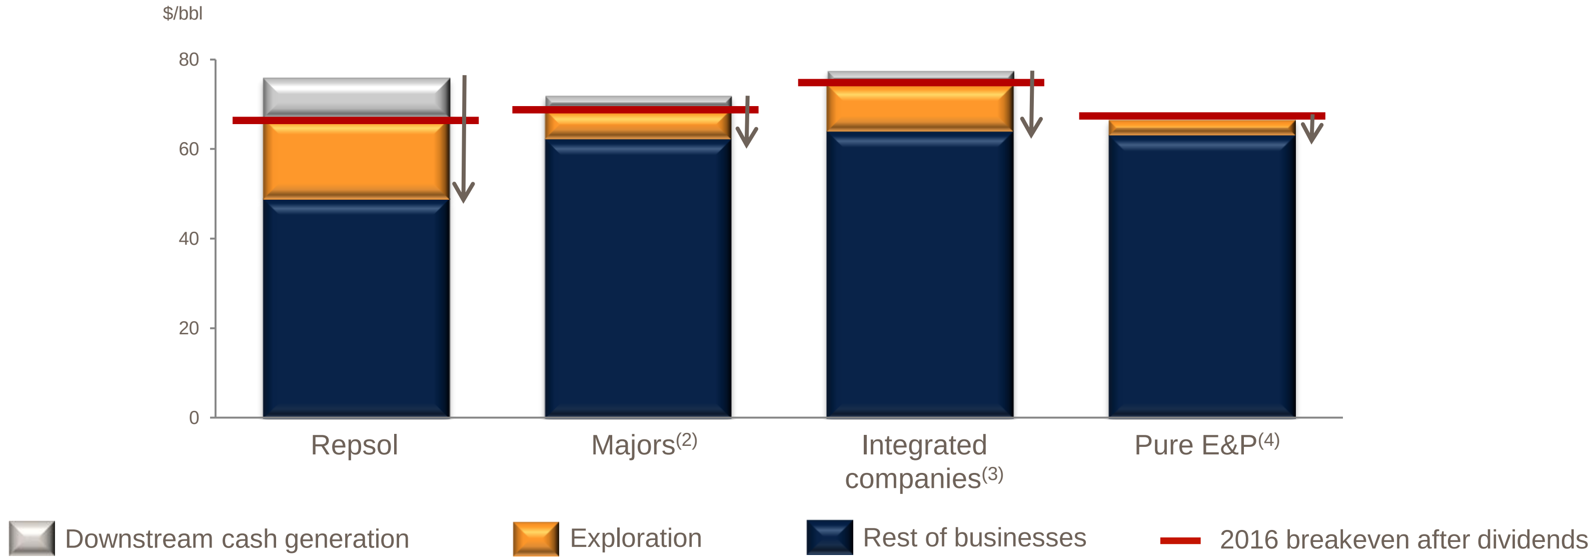


Resilience: $50/bbl free cash flow breakeven after dividend

1. Scenario used to estimate breakevens of HH $3.5/Mbtu and Repsol refining margin indicator of $6.4/bbl, both flat from 2016 to 2020. Breakeven does not include any proceeds from divestments, with the exception of the piped LPG sale already accomplished (piped LPG sale of €0.7 B in September 2015, with €0.6 B to be accounted for in 2016).
2. Sensitivities: With HH at $3/Mbtu (instead of $3.5/Mbtu) breakeven increases an average of $2/bbl. With refining margin indicator at $5/bbl (instead of $6.4/bbl) breakeven increases an average of $5/bbl.

Repsol's FCF breakeven reduction capacity well positioned within industry

// Company FCF breakeven in 2016 (after dividends)(1) //



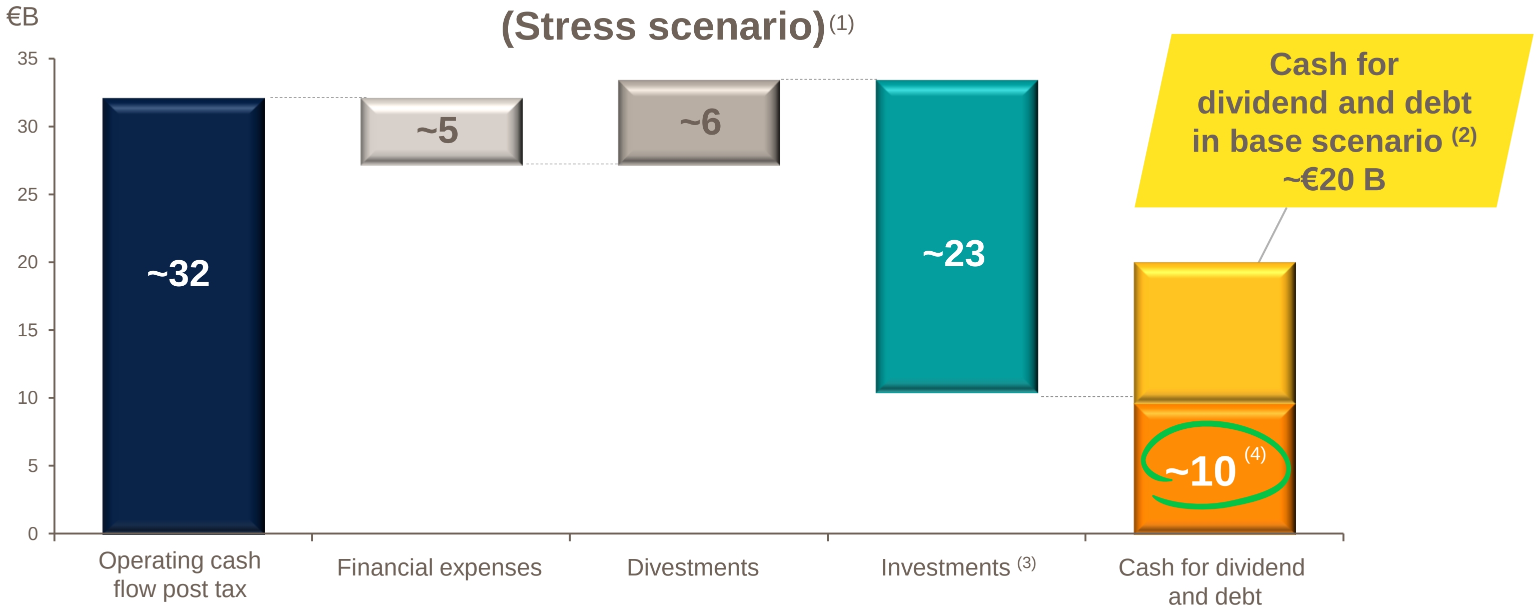
Repsol's strong Downstream significantly contributes to lowering breakeven
Exploration provides high flexibility to reduce breakeven

1. Wood Mackenzie data except for Downstream business.
2. Majors: Exxon, Statoil, Shell, Chevron, BP and Total.
3. Integrated companies: OMV, ENI.
4. Pure E&P: Chesapeake, Anadarko, Apache, Devon, Oxy, EOG and CNRL.

Key strategic lines 2016-2020: Value & Resilience

Self-financed Strategic Plan

// Cash movements 2016-2020 (accumulated) // (Stress scenario)(1)



Self-financed Strategic Plan even under the stress scenario ($50/bbl flat)

1. Scenario used (stress): Brent $50/bbl, HH $3.5/Mbtu and Repsol refining margin indicator of $6.4/bbl, from 2016 to 2020.
2. Base case scenario starting at Brent = $65/bbl and HH = $3.5/Mbtu in 2016, increasing to $75/bbl and $4.0/Mbtu in 2017, $85/bbl and $4.6/Mbtu in 2018, $90/bbl and $4.7/Mbtu in 2019 and $91.8/bbl and $4.8/Mbtu in 2020, with a constant refining margin of $6.4/bbl.
3. From the ~€23 B investments, ~€19 B are from Upstream and ~€4 B from Downstream.
4. FCF sensitivities (5 years accumulated): Brent +$5/bbl = €1.5 B; HH +$0.5/Mbtu = €0.7 B; Repsol refining margin indicator +$1/bbl = €1.1 B.

Upstream strategy 2016-2020

REPSOL

// Starting point //
(Repsol + Talisman)

- **Broad geographic footprint** with some subscale positions
- Long pipeline of **organic growth** opportunities
- **Unconventionals** portfolio

Efficiency Program

- Opex
- Capex

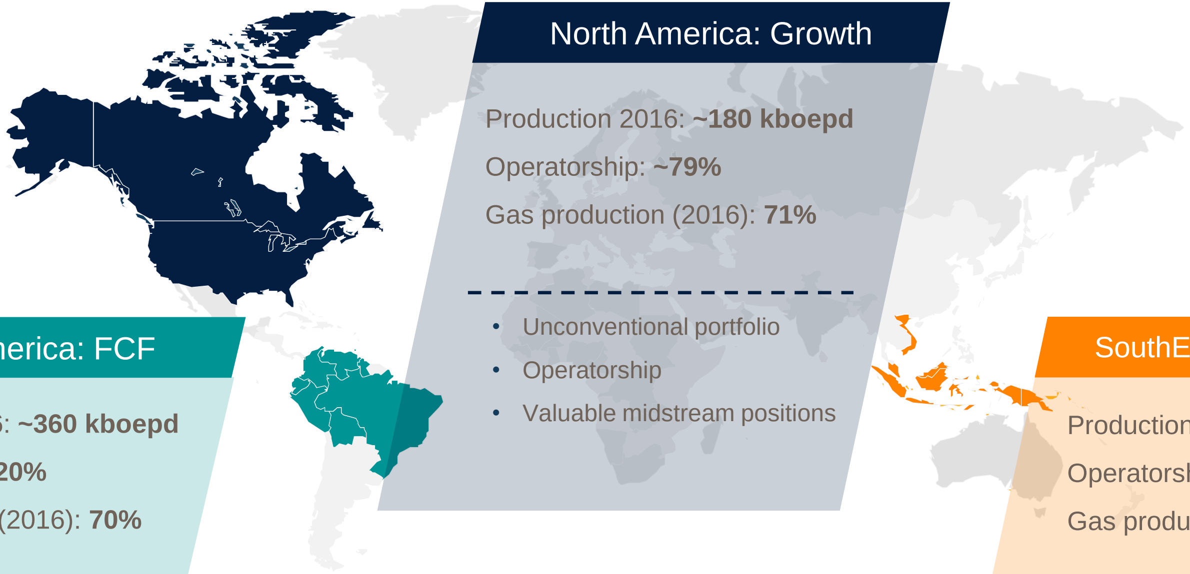
Portfolio management

- Exploration optimization
- Investment rationalization
- Divestments

// Strategic positioning //

- Lower Capex intensity and improved value
- More resilient with FCF Upstream breakeven down to ~$75/bbl in 2016-2017 and ~$60/bbl in 2018-2020
- Geographically and play-type focused (3 regions, 3 play types)
- Production scaled at 700-750 kboepd sustained by the right reserve base

3 core regions in the portfolio



North America: Growth

Production 2016: **~180 kboepd**

Operatorship: **~79%**

Gas production (2016): **71%**

- Unconventional portfolio
- Operatorship
- Valuable midstream positions

Latin America: FCF

Production 2016: **~360 kboepd**

Operatorship: **~20%**

Gas production (2016): **70%**

- Regional scale
- Exploration track record
- Cultural fit

SouthEast Asia: FCF & Growth

Production 2016: **~85 kboepd**

Operatorship: **~37%**

Gas production (2016): **77%**

- Self-financed growth
- Relationship with governments/NOCs
- High potential exploration blocks

An extensive pipeline of organic opportunities

Corporation

Downstream to provide sustainable value

REPSOL

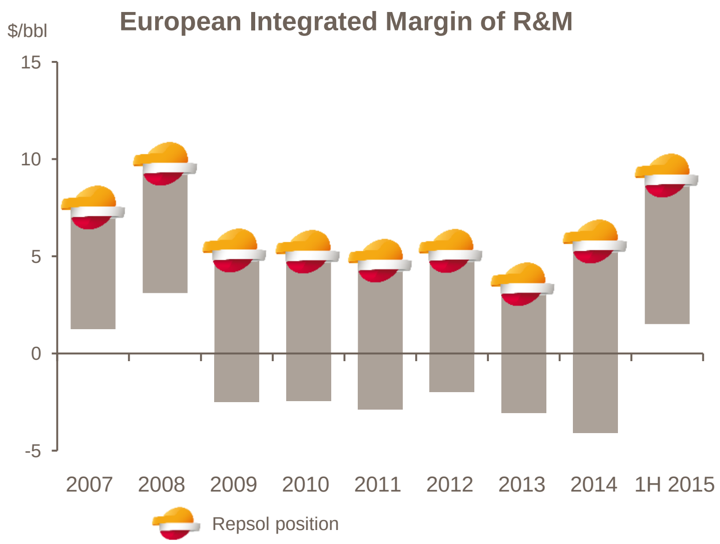
Maximize performance	• Taking advantage of the integration between refining and marketing businesses with focus on reliability
Capital discipline	• Discipline in capital allocation • Divestments of non-core assets for value creation
Margin improvement & Efficiency Program	• Optimizing integrated margin across businesses • Strong focus on reducing energy cost and CO_2 emissions

Objective to generate FCF ~ €1.7 B/y (average 2016-2020)

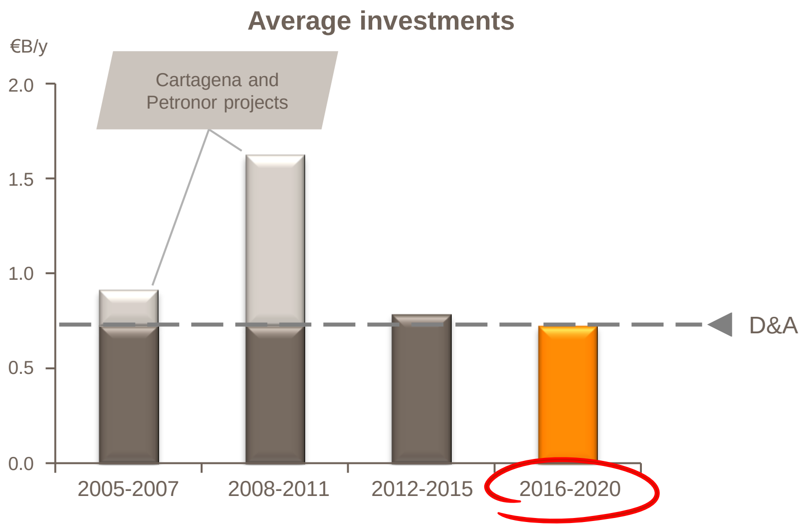
2016-2020 Downstream strategy: Maximizing value and cash generation leveraged on fully invested assets

// Sustainable value from quality assets //

Repsol in leading position among european peers



// Investment discipline //



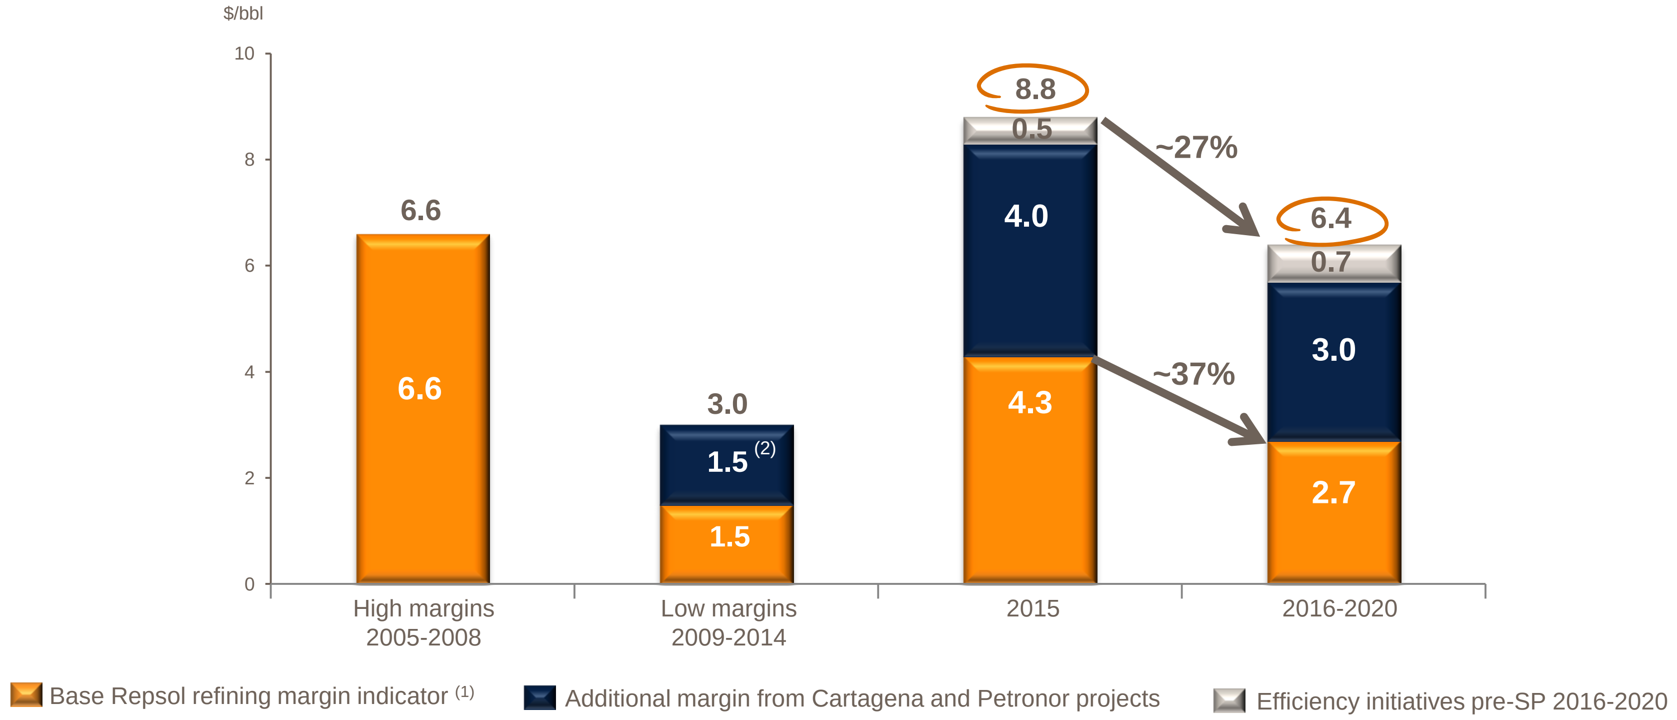
Downstream resilience reinforced by commercial business integration with industrial businesses

Note: Integrated R&M margin calculated as CCS/LIFO-Adjusted operating profit from the R&M segment divided by the total volume of crude processed (excludes petrochemicals business) of a 9-member peer group. Based on annual reports and Repsol's estimates. Source: Company filings.
Peers: 2015: Eni, Total, Cepsa, Galp, Saras, OMV, MOL, Neste Oil, Hellenic // 2014 and previous: Eni, Total, Cepsa, Galp, Saras, OMV, MOL, PKN Orlen, Hellenic.

Repsol's refining margin indicator evolution

Margins back to a mid cycle scenario

// Repsol's refining margin indicator 2005-2020 //



1. Excluding margin from Cartagena and Petronor projects and efficiency improvement programs.
2. Start-up of Cartagena and Petronor projects in late 2011.

Fundamentals support sustained Repsol refining margins

REPSOL

Lower Opex	✓ Lower oil and gas prices
Growing refined products demand	✓ Average demand growth of 1.2% for 2016-2020 on top of strong 2015 demand ✓ Spain fuels demand growth at 4% in 2015
European refineries at high utilization of effective capacity	✓ Lower EU effective capacity due to low maintenance activity in recent years ✓ Low Brent-WTI and NBP-HH gaps and low $/€ exchange rate
Restarts unlikely in EU	✓ Restarts unlikely due to required investment in working capital and fixed costs with long-term uncertainties remaining for less competitive refineries in EU
Refining project delays and cancellations	✓ Capacity-addition delays and cancellations due to stressed cash position of integrated companies and NOCs
Demand vs. effective capacity tighter than previous years	✓ Capacity additions offset by growing demand
Light-Heavy differentials	✓ Marpol [1] increases diesel demand, while lowering fuel oil demand and price ✓ Large increase in production of heavy crudes

1 Marpol: International convention for the prevention of pollution from ships.

Downstream efficiency and margin improvement program

REPSOL

// Projects //	// Levers //	// EBIT increase by 2018 //
Refining	• Energy cost reduction • Improved planning to increase crude supply flexibility • Operations optimization including fixed-cost reductions • Increased asphalt production in Peru	~€250 M/y
Integrated margin	• Optimization of integrated margin across the value chain with: optimization of crackers supply, processing challenging crude...	~€100 M/y
Commercial businesses	• Network structure optimization • Logistics and planning improvements	~€100 M/y
Chemicals	• Operational improvement focused on raw material flexibility and facilities reliability • Optimization of pricing strategy	~€50 M/y

Total target of ~€0.5 B/y

~€500 M/y from Downstream efficiency improvement

Selected examples: Downstream

// Initiative //	// Description //	// Status //	// Impact on EBIT //
Petronor steam reduction	Minimize use of turbines, repair leaks, maximize condensate return, optimize steam ratios and pressures	✓ Under implementation	**€41 M/y**
Cartagena hot standby boilers	Technical upgrades allowing reduced consumption and improved safety of supply	✓ Under implementation	**€9 M/y**
Processing more challenging crudes	Margin integration along the supply chain to maximize CPC blend crude oil processing (CPC contaminates LPG to be cracked by chemicals) [1]	✓ Under implementation	**€8 M/y**
Commercial plan for coke	Optimize coke trading and commercialization	✓ Under implementation	**€4 M/y**
Logistics optimization	Optimization of the benzene logistics, from road to railway, with further reduction of emissions of CO_2 by more than 800 t/y	✓ Under implementation	**€2 M/y**
Crackers: Flexibility of raw material	Introduce flexibility of raw material fed to crackers, swapping Naphtha for LPG	To be launched	**€25 M/y**

1. Negative impact for Chemicals and LPG BUs but positive for Refining and Trading, with overall positive impact.

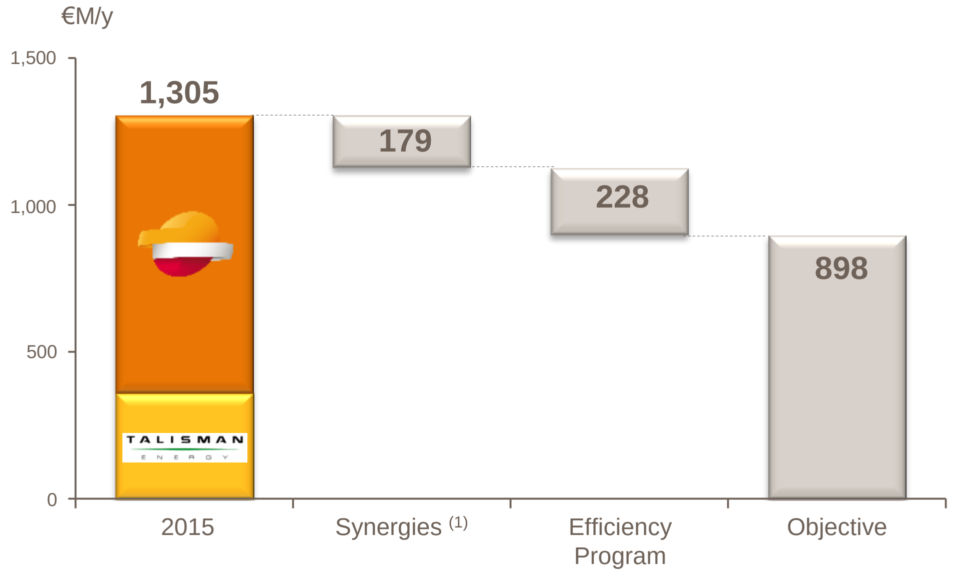
Talisman adding ~ €0.4 B/year corporate cost that will be offset by synergies and efficiency programs

Synergies from integration

+

Corporate Efficiency Program

// Corporate costs //



Reduction of corporate cost in 3 years equivalent to entire Talisman corporation

1. Included in the $350 M/y synergies total target.

Safety and Sustainability, a priority for the company

// Carbon strategy – Facing the issues //

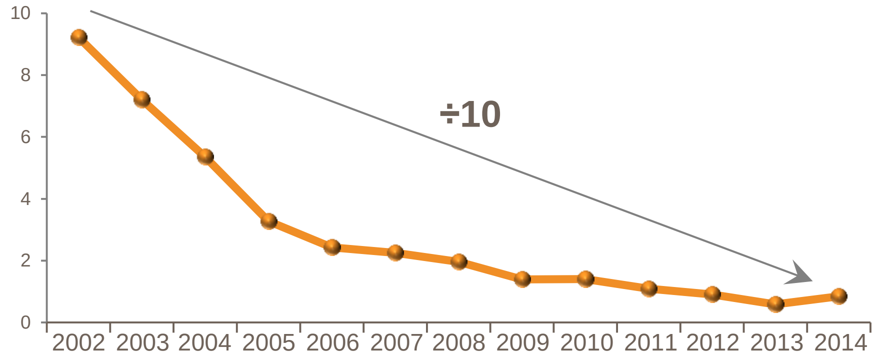
Carbon pricing
- Cost of CO_2 applied to all investment decisions

Energy efficiency
- Efficiency programs ongoing to reduce energy consumption by 12% (1)

CO_2 reduction
- Objective: 35% (2) reduction in 2020
- 22% achieved by the end of 2014

// Safety, a non-negotiable value in Repsol //

Lost Time Injuries Frequency



✓ **Goal to achieve zero accidents by 2020**

✓ **Strong commitment to total safety embedded in the cost efficiency program**

1. Energy reduction for the 2014-2020 period.
2. 2020 objective referenced to 2010 CO_2 levels.

Gas Natural Fenosa strategic stake

Strong profitability with long term strategic vision

30% of valuable stake in a leading gas & power company

Stable dividend with growth potential

**Strong profitability performance
(well above wacc and not linked to oil price)**

Group’s renewables platform

Provides strategic optionality for a stronger role of gas in energy mix

Liquid investment that provides financial optionality
