This document contains statements that Repsol believes constitute forward-looking statements which may include statements regarding the intent, belief, or current expectations of Repsol and its management, including statements with respect to trends affecting Repsol's financial condition, financial ratios, results of operations, business, strategy, geographic concentration, production volume and reserves, capital expenditures, costs savings, investments and dividend payout policies. These forward-looking statements may also include assumptions regarding future economic and other conditions, such as future crude oil and other prices, refining and marketing margins and exchange rates and are generally identified by the words "expects", "anticipates", "forecasts", "believes", estimates", "notices" and similar expressions. These statements are not guarantees of future performance, prices, margins, exchange rates or other events and are subject to material risks, uncertainties, changes and other factors which may be beyond Repsol's control or may be difficult to predict. Within those risks are those factors described in the filings made by Repsol and its affiliates with the "Comisión Nacional del Mercado de Valores" in Spain and with any other supervisory authority of those markets where the securities issued by Repsol and/or its affiliates are listed.

Repsol does not undertake to publicly update or revise these forward-looking statements even if experience or future changes make it clear that the projected performance, conditions or events expressed or implied therein will not be realized.

This document mentions resources which do not constitute proved reserves and will be recognized as such when they comply with the formal conditions required by the system "SPE/WPC/AAPG/SPEE/SEG/SPWLA/EAGE Petroleum Resources Management System" (SPE-PRMS) (SPE – Society of Petroleum Engineers).

In October 2015, the European Securities Markets Authority (ESMA) published its Guidelines on Alternative Performance Measures (APMs). The guidelines apply to regulated information published on or after 3 July 2016. The information and breakdowns relative to the APMs used in this presentation are updated quarterly on Repsol´s website.

This document does not constitute an offer or invitation to purchase or subscribe securities, pursuant to the provisions of the Royal Legislative Decree 4/2015 of the 23rd of October approving the recast text of the Spanish Securities Market Law and its implementing regulations. In addition, this document does not constitute an offer to purchase, sell, or exchange, neither a request for an offer of purchase, sale or exchange of securities in any other jurisdiction.

The information contained in the document has not been verified or revised by the External Auditors of Repsol.

Strategic Plan 2021-2025:
Delivering a compelling investment case into the Transition

- A legacy **double-geared engine** providing cash-flow and solid foundations for the Transition
- **Profitable business platforms** with leading **advantaged positions:** Iberia & Downstream
- **New operating model**, catalyzing value transparency & De-carbonization
- Leading shareholder distribution with a **top quartile remuneration**
- Preserving our financial strength

- A **profitable** ambition of net zero emissions and multienergy **company growth** (FCF growth)
- **Distinctive** potential for transformation to 2030 in terms of speed, intensity and feasibility

A profitable company in the Energy Transition with strong cashflow growth & capital discipline

Business Build

EQUITY PARTNERs or IPO

New corporate model enabling value crystallization

1. Refining Spain and Peru R&M 2. Lubricants, Asphalts and Specialties

Clear logic for Repsol new corporate model

Clear **differentiation of businesses profiles and equity stories** within the Group

Alignment of cost of capital with business profile for each business

Ability to develop **appropriate partnerships** for each business

Value crystallization and transparency

Acceleration **of new ways of working**

Path to 2030

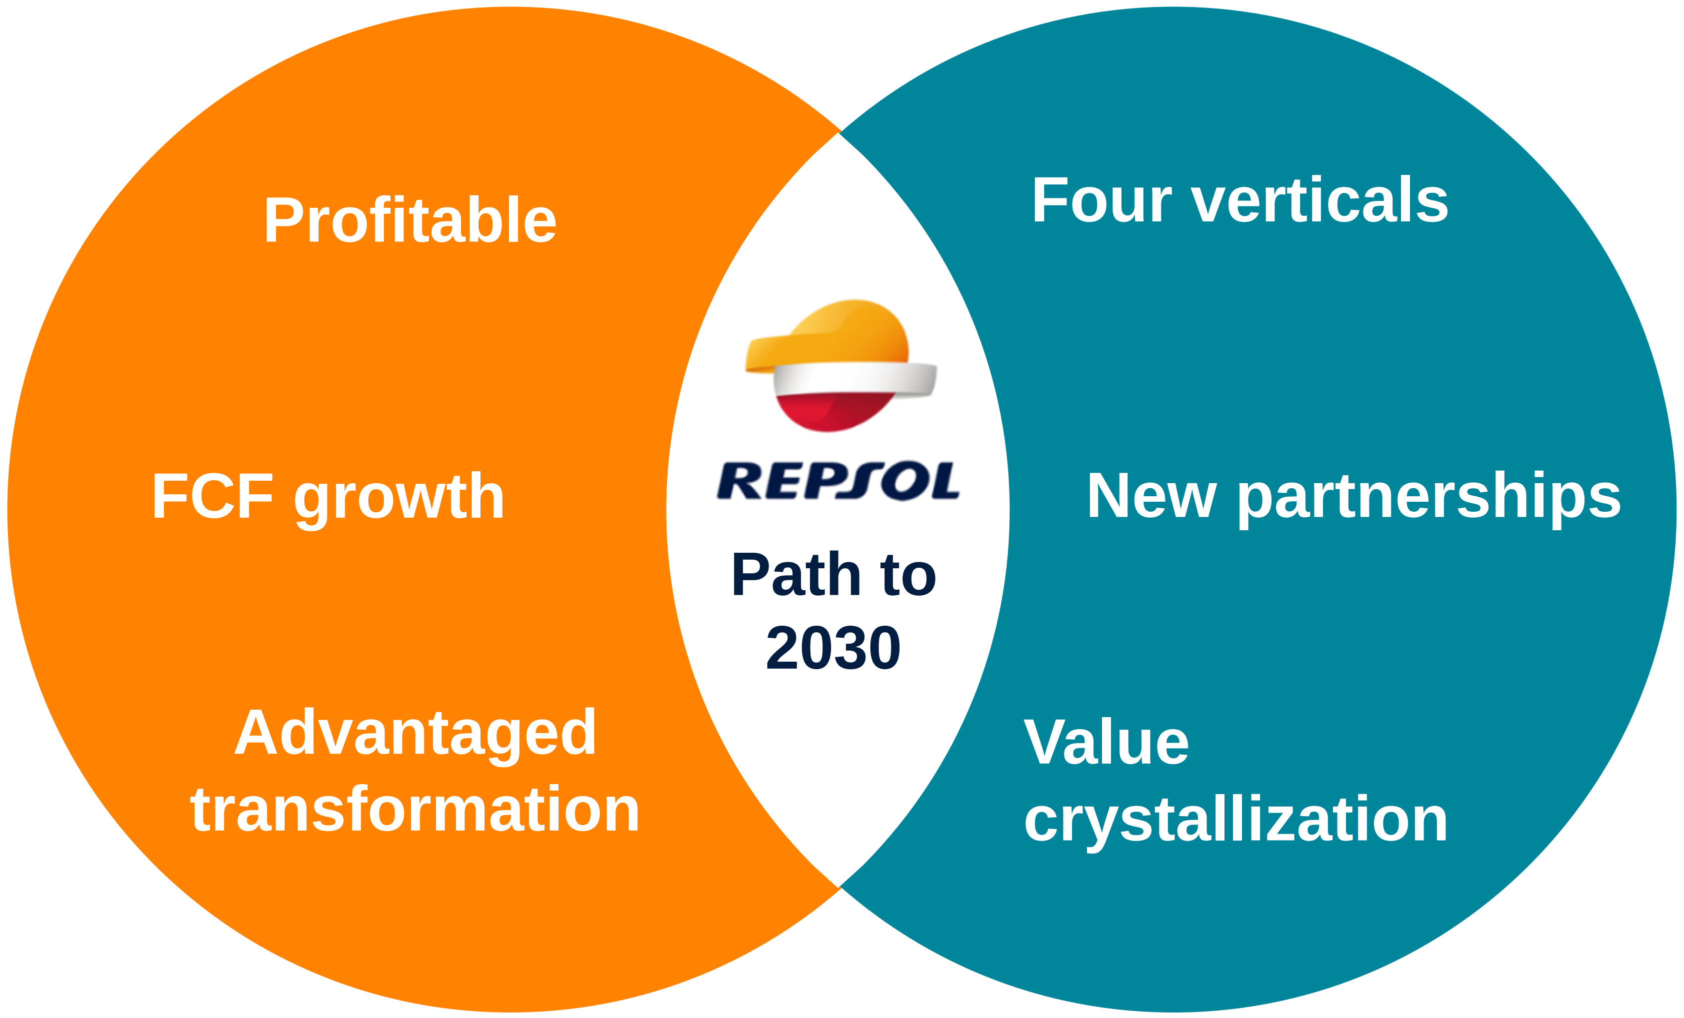
02.

Ambitious transformation journey to thrive in Energy Transition

REPSOL

De-carbonize the portfolio

New operating model

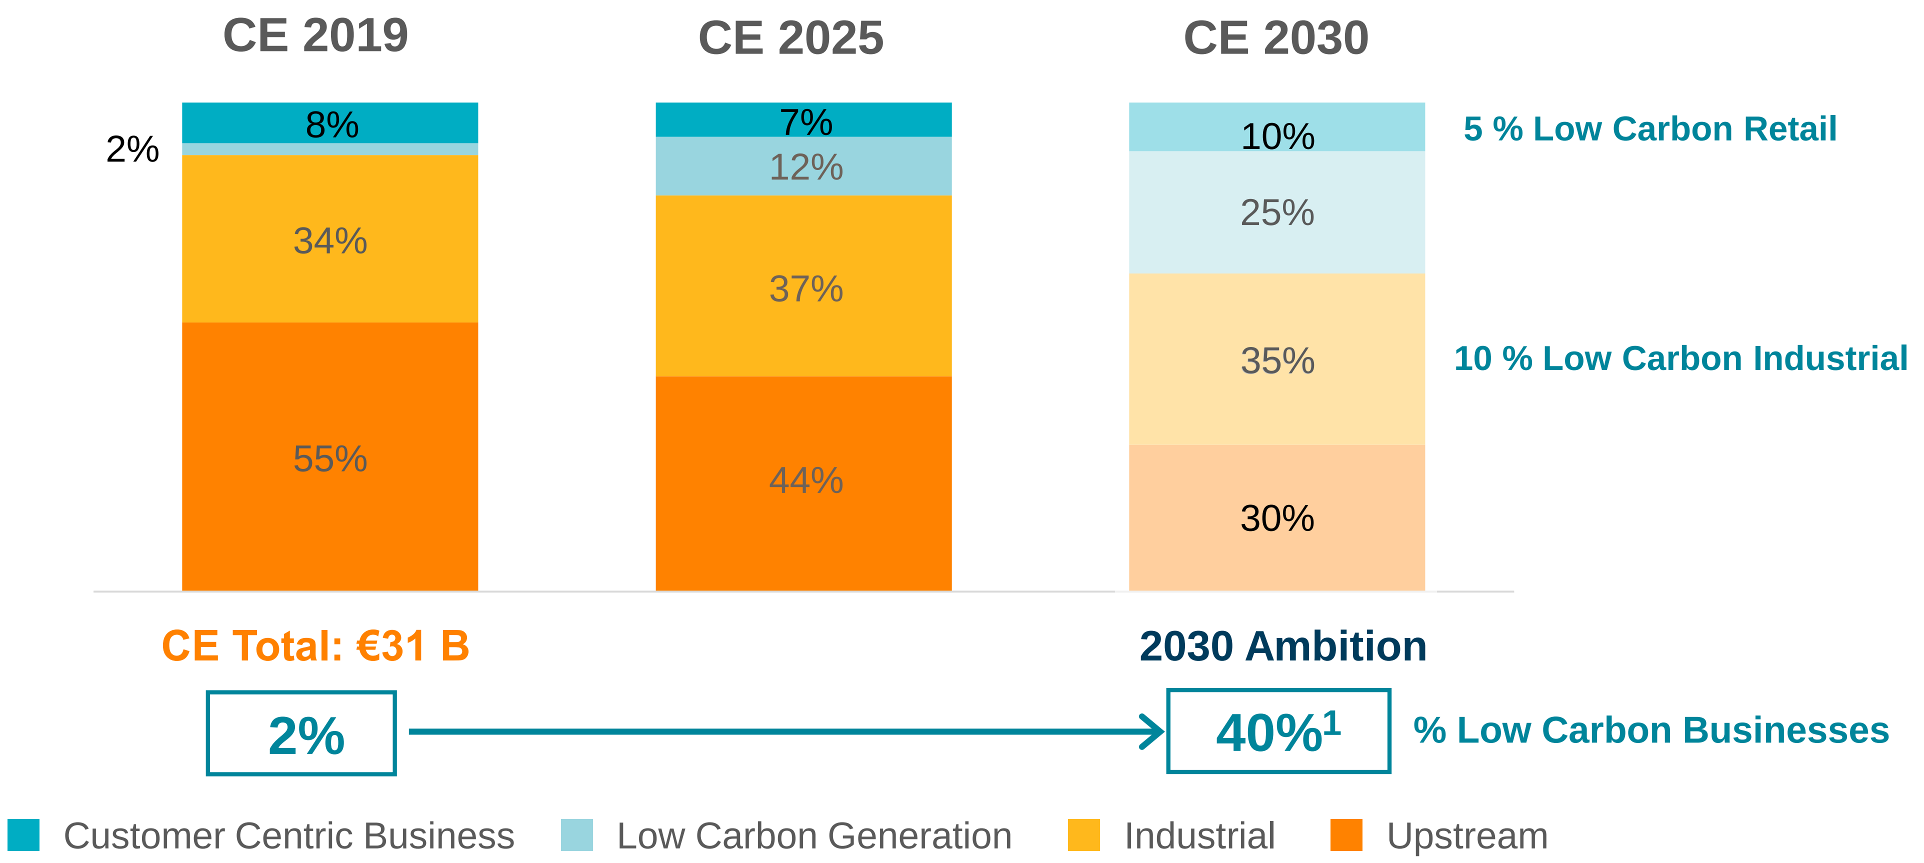


Towards Net Zero emissions

Leading investor proposition

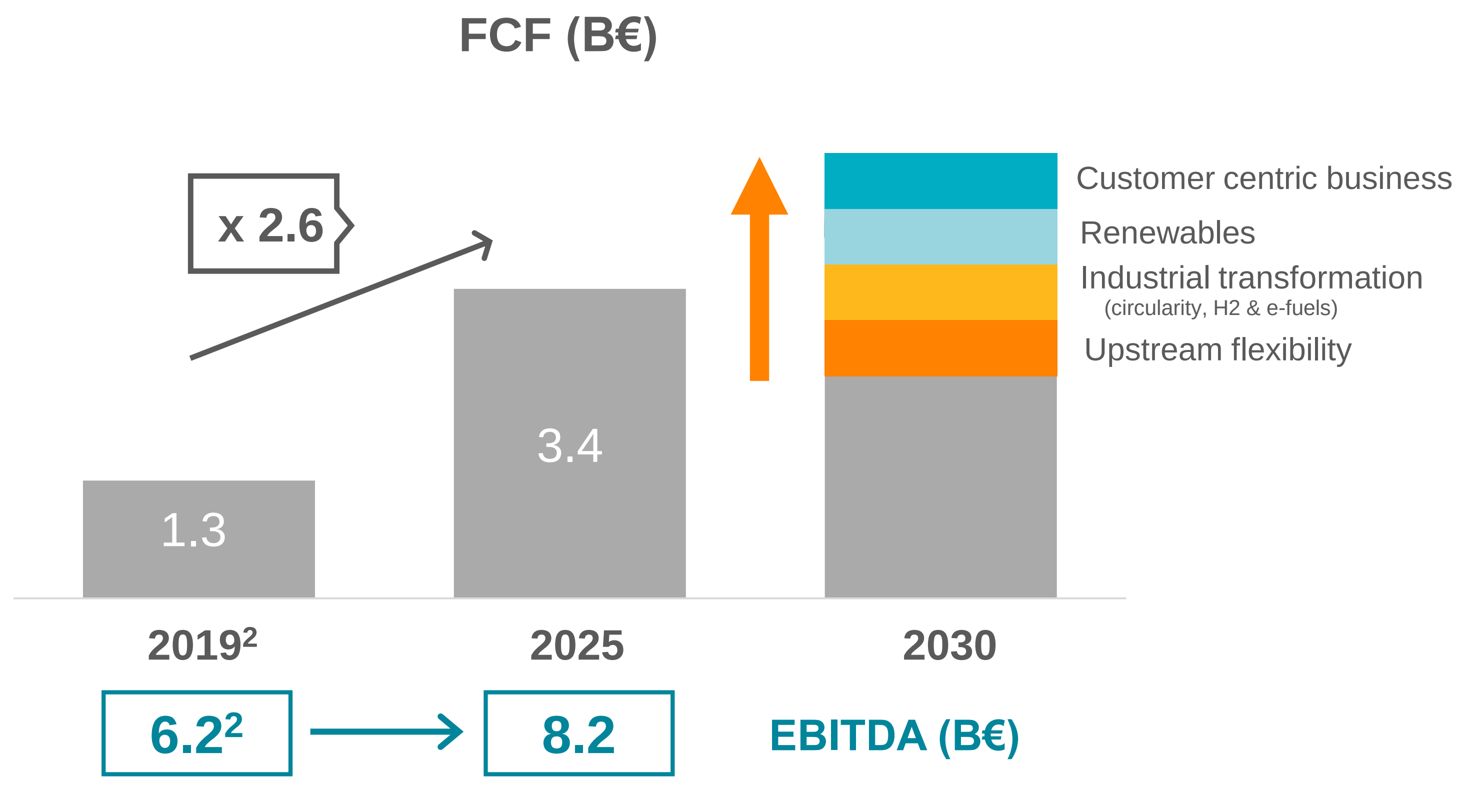
Repsol 2030: A more sustainable, balanced and profitable company

Transforming the company's portfolio



2030 Repsol's Low Carbon business: ~40% of CE

Strong **cash-flow growth**



Growing 2030 FCF well above 2025

1. Increase in low carbon CE through investments in low carbon generation, new industrial low carbon platforms (circularity, H_2 & e-fuels, etc.), decarbonization through efficiency initiatives, e-mobility, and value-added services, among others
2. In homogeneous price basis @$50/bbl & $2.5 HH

Note: CE of RES considering consolidation by the proportional method. Capital employed figures not including Corporation (€2 B in 2019)

Strategy 2021-25:

03.

Delivering financial targets while transforming the company

Ambition 21-25

2021 - 2022

- Efficiency & capital discipline
- Capex reduction
- Prudent financial policy and commitment with current credit rating

2023 - 2025

- Portfolio optimization & new business platforms
- Metrics growth & high Capex intensity
- ROCE and gearing

Self-financed plan @$50/bbl & $2.5 HH

Ensuring shareholder value maximization

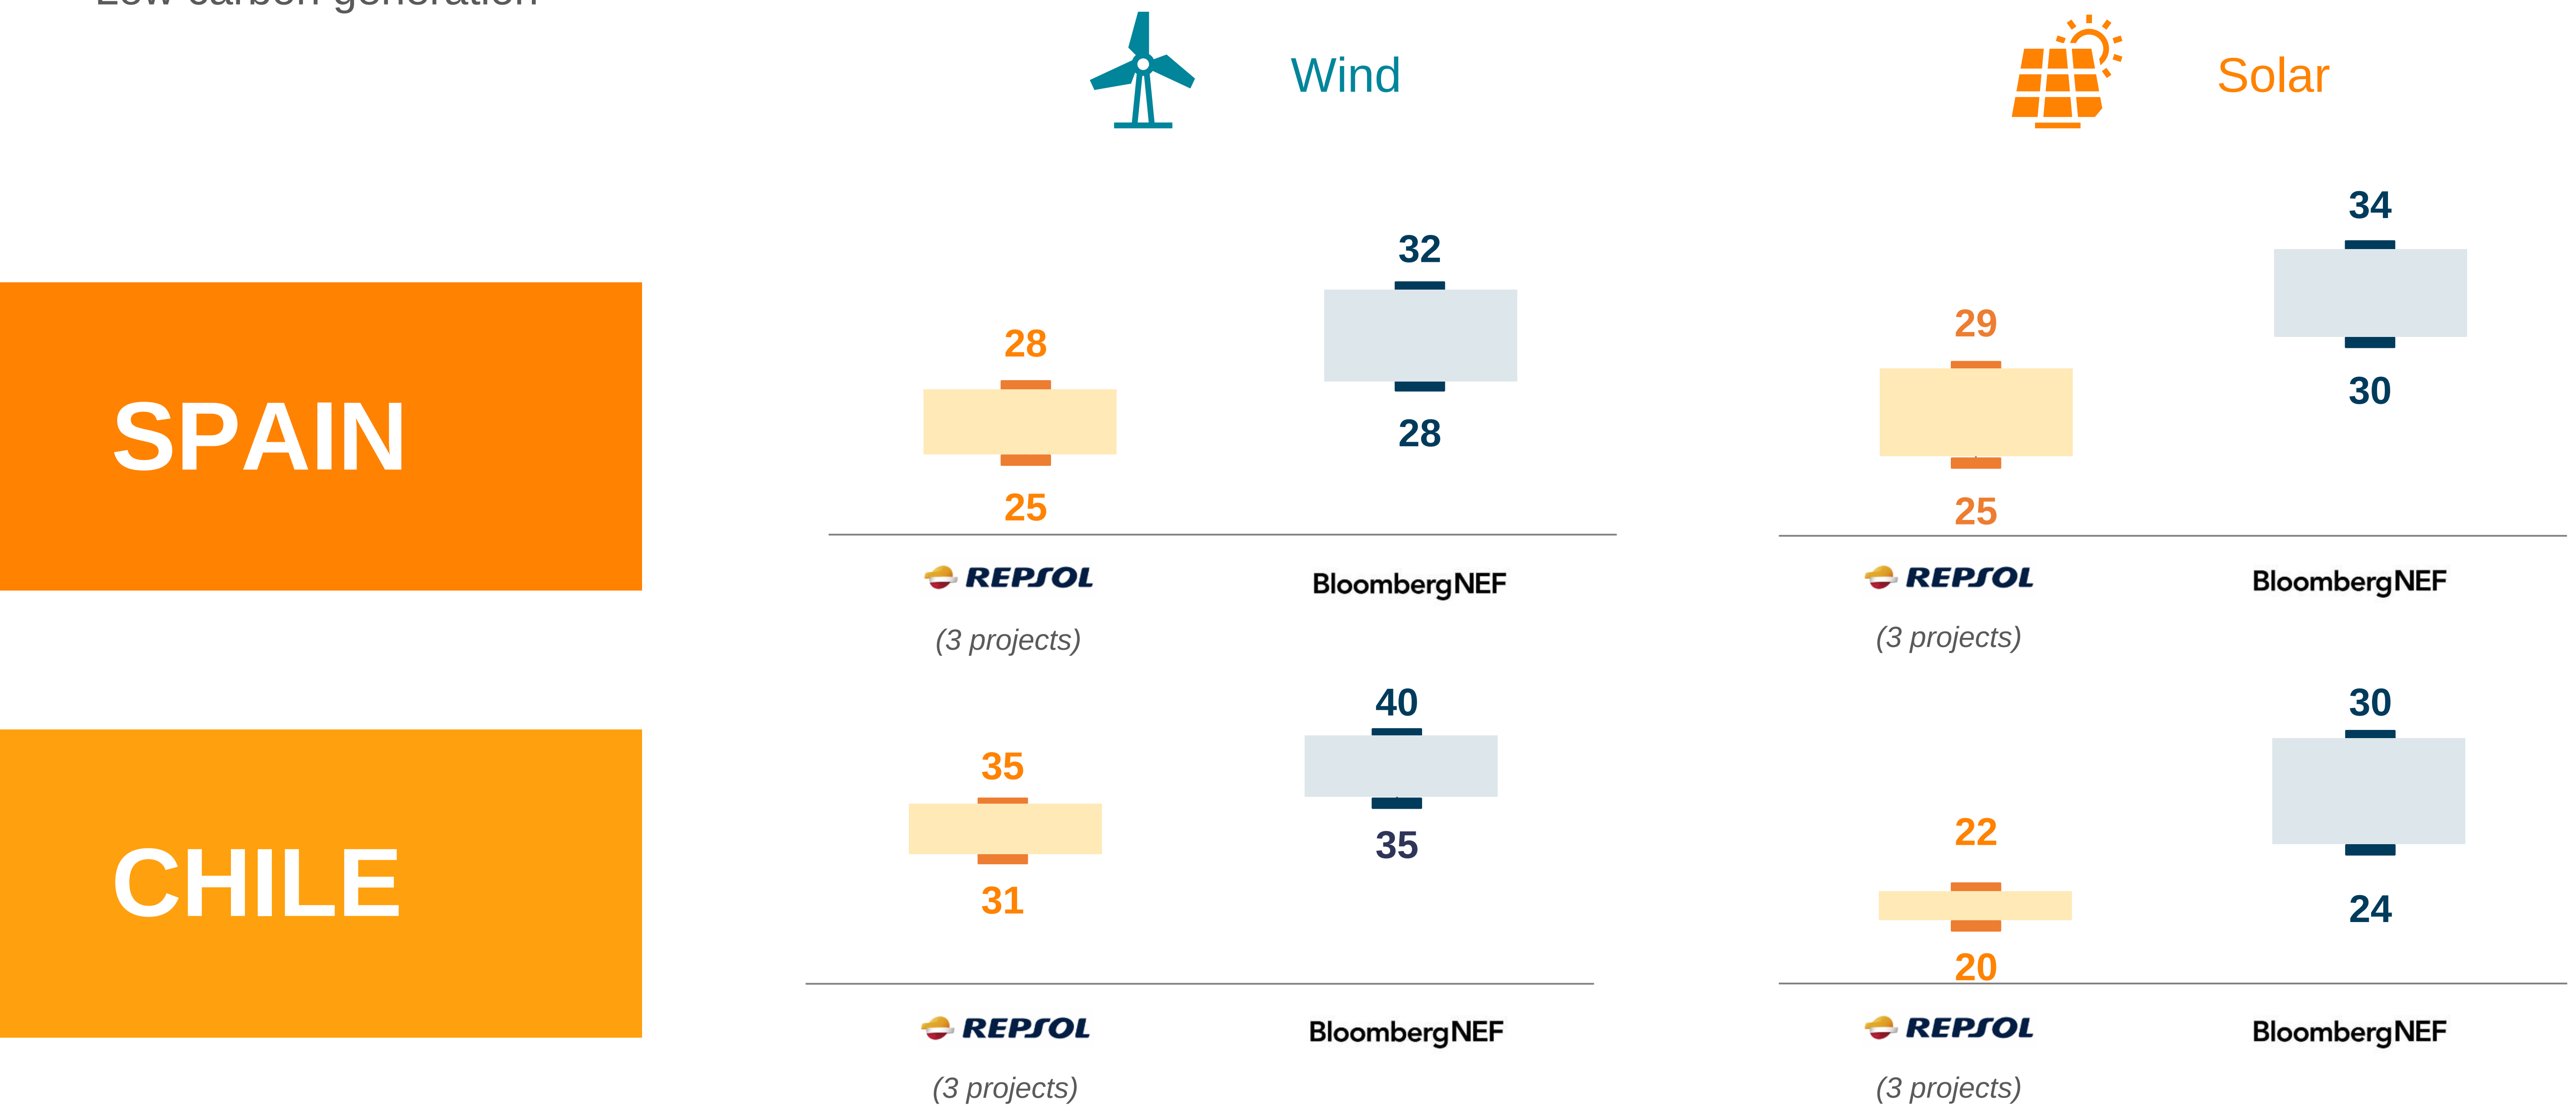
2. COD: Commercial Operation Date 3. Estimated figures average for wind and solar projects without selling down equity stakes Note: Considering 50% JV stake in Chile
4. Not including other conventional generation as Cogeneration (622 MW) and CCGTs (1,648 MW)

Repsol RES project portfolio in Spain and Chile with attractive economics

Low carbon generation



Levered IRR

	Levered IRR
SPAIN	10% - 12%
CHILE	12% - 18%

1. Note 1: Repsol COD 2020-23 projects Levelized Cost of Energy vs. BNEF[1] Spain LCOE references. Note 2: Repsol COD 2021-23 projects Levelized Cost of Energy vs. BNEF1 Chile LCOE references. Note 3: BloombergNEF models estimate LCOEs range for each technology and geography in a given period. Repsol projects' LCOEs are calculated with the same methodology used by BNEF. Comparable LCOEs from BNEF used for each set of projects. Average case from BNEF taken. Note: 1.15 $/€ exchange rate used in LCOEs figures for Chilean assets.

Stepping up energy transition

05.

Decarbonization is an opportunity to build business platforms as technology evolves

2020-2025 | 2025-2030 | +2030

Industrial transformation

- Advanced biofuels, biogas and recycling
- Renewable hydrogen → Synthetic fuels (e-fuels)

Renewable generation

- Hybrid plants
- Stationary energy storage

Customer-centric businesses

- Low carbon power retail + Energy Solutions
- Dual-platform advanced mobility

Carbon sinks

- Natural Climate Solutions[1]
- Carbon Capture Utilization & Storage

1. Forestry JV Repsol Fundación, Sylvestris, Land Life Company

Ambition to become a leader in the Iberian Peninsula

Renewable Hydrogen

REPSOL

Multi-technology approach

providing flexibility,
and optimizing production

Electrolysis

Biomethane
in existing SMRs[1]

Photoelectrocatalysis
proprietary technology

Largest H_2 consumer (72%) and producer in Spain

Privileged integrated position allowing **arbitrage between self-consumption and other final uses**

Transportation and e-fuel
leveraging SSs

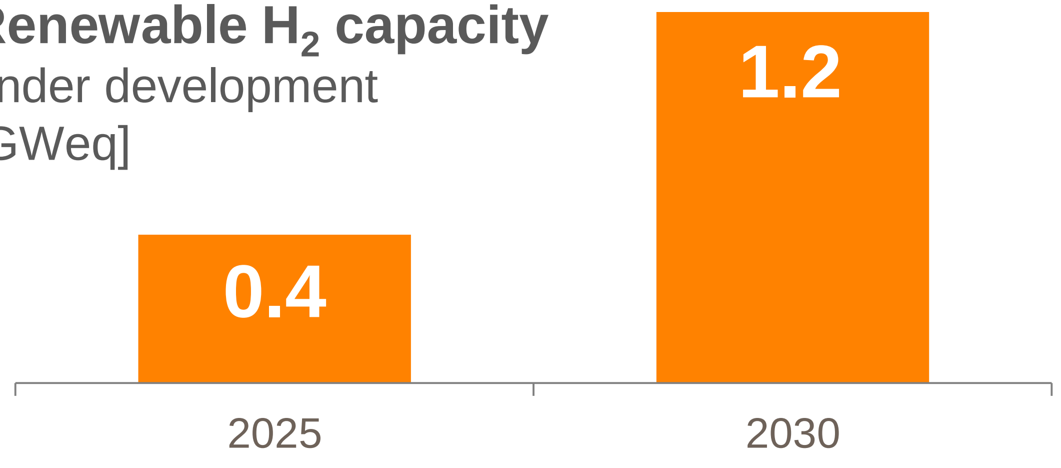
Industrial feedstock
to other players

Gas network injection
blended with gas for residential and industrial use

Electricity storage
for flexible power generation

Clear ambition[2] to become Iberian leader

Renewable H_2 capacity
under development
[GWeq]



64 kt/y | **H_2 production[3]** | **192 kt/y**

Repsol to become an active H2 player
across uses, and a strategic partner to develop the Government ambition

1. Steam reformer 2. Repsol's hydrogen ambition conditioned to access to regulatory changes and availability of EU recovery funds Plan
3. Considering a ratio of 0.02 t/h per MW and 8,000 hours of operation per year based on Repsol's past projects

Repsol with clear advantages in renewable hydrogen production

Renewable Hydrogen

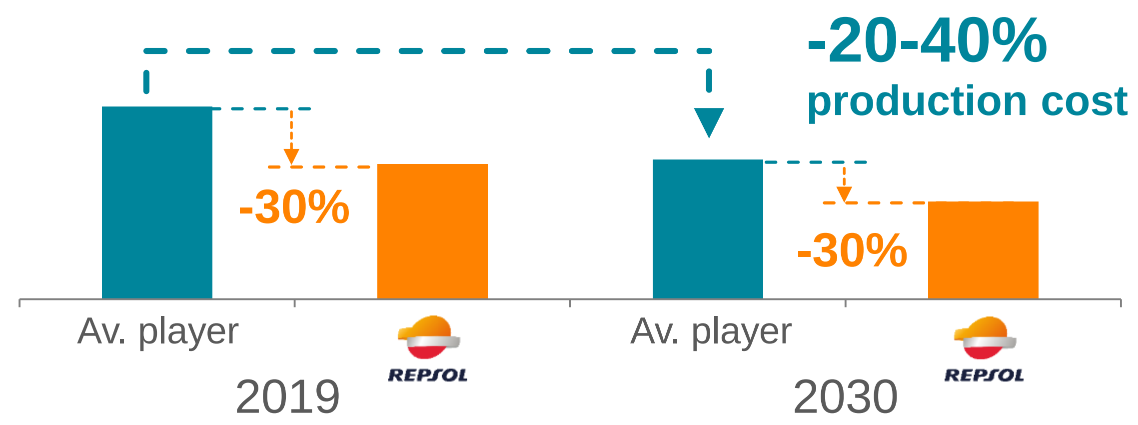
Repsol's with an **advantageous position** resulting in **tier#1 LCOH[1] ~30%** lower vs. a local renewable H_2 producer

- Renewable H_2 production from biomethane to become competitive in the short term
- Integration in current sites and with own renewable power generation

Spain, the best EU location to produce hydrogen with electrolyzers

- Lower production costs due to better renewable resource
- Spain reaching renewable H_2 (with electrolyzers) competitiveness five years before Germany

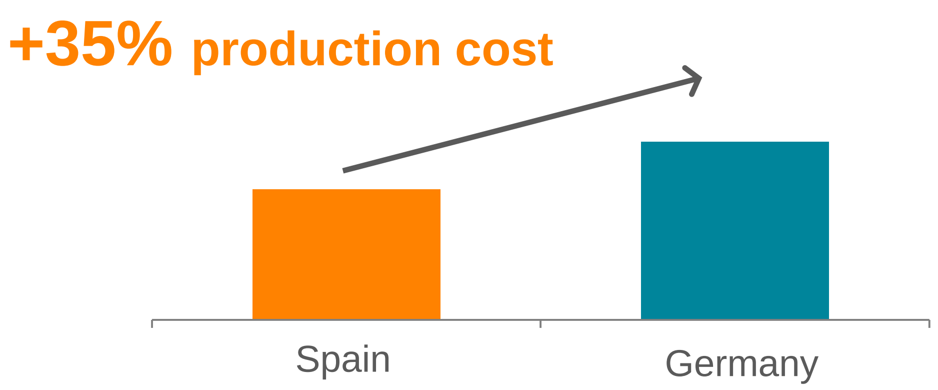
Renewable H_2 production cost for an av. player in Spain (€/kg)



Competitiveness of electrolytic vs. fossil fuel H_2, expected by 2030, could be brought forward by

- Technology cost reduction (massive adoption)
- Higher carbon price
- Regulatory mechanisms, as/if needed

Production cost via electrolysis in 2030[2] (€/kg)



1. Levelized Cost of Hydrogen assuming 50% of the renewable H_2 production made with biomethane and the remaining 50% with electrolyzers. 2. Spain with an average LCOE of €33.2/MWh and Germany with an av. LCOE of €48.3/MWh in 2030

Repsol best positioned to lead H_2 development and cost competitiveness as the main consumer in Spain (vs. non-consuming players interested in high prices to drive production)

Repsol becoming an advantaged producer

Sustainable biofuels

REPSOL

Repsol best positioned for sustainable biofuels production

Already a leading biofuels producer, and **first biofuels marketer in Spain** (66% share)

Leveraging our **tier one industrial sites** to produce biofuels in own facilities through modifications of current units

– **Lower Capex**: <€500/t in existing plants (vs. >€1000/t of peer's new plants)

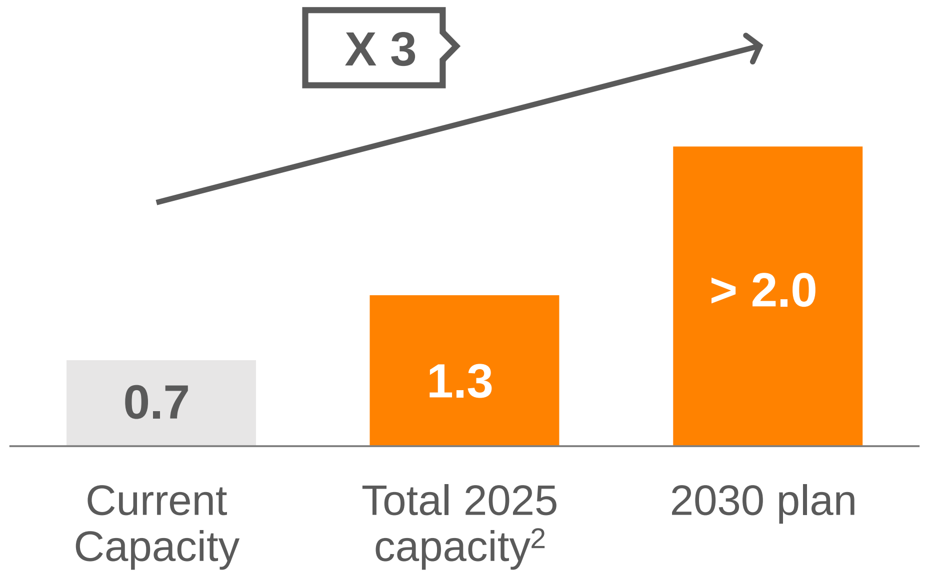
Average projects **IRR >15%**

Positioning, scale and relevance of our industrial hubs key to secure feedstock

Reaching > 2 Mta of sustainable biofuels in 2030[1]

Sustainable biofuels gross production (Mta)

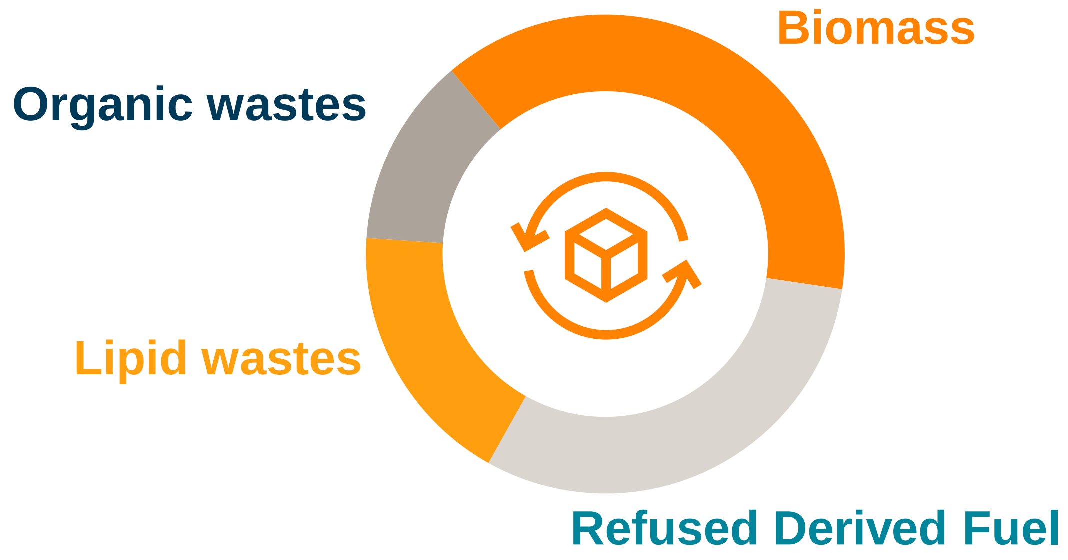
Updated ambition: from 600kt of HVO to >2 Mt of sustainable biofuels



Repsol with a **leading sustainable biofuels ambition**

With a multi-technology and raw material approach

Use of wastes as feedstock

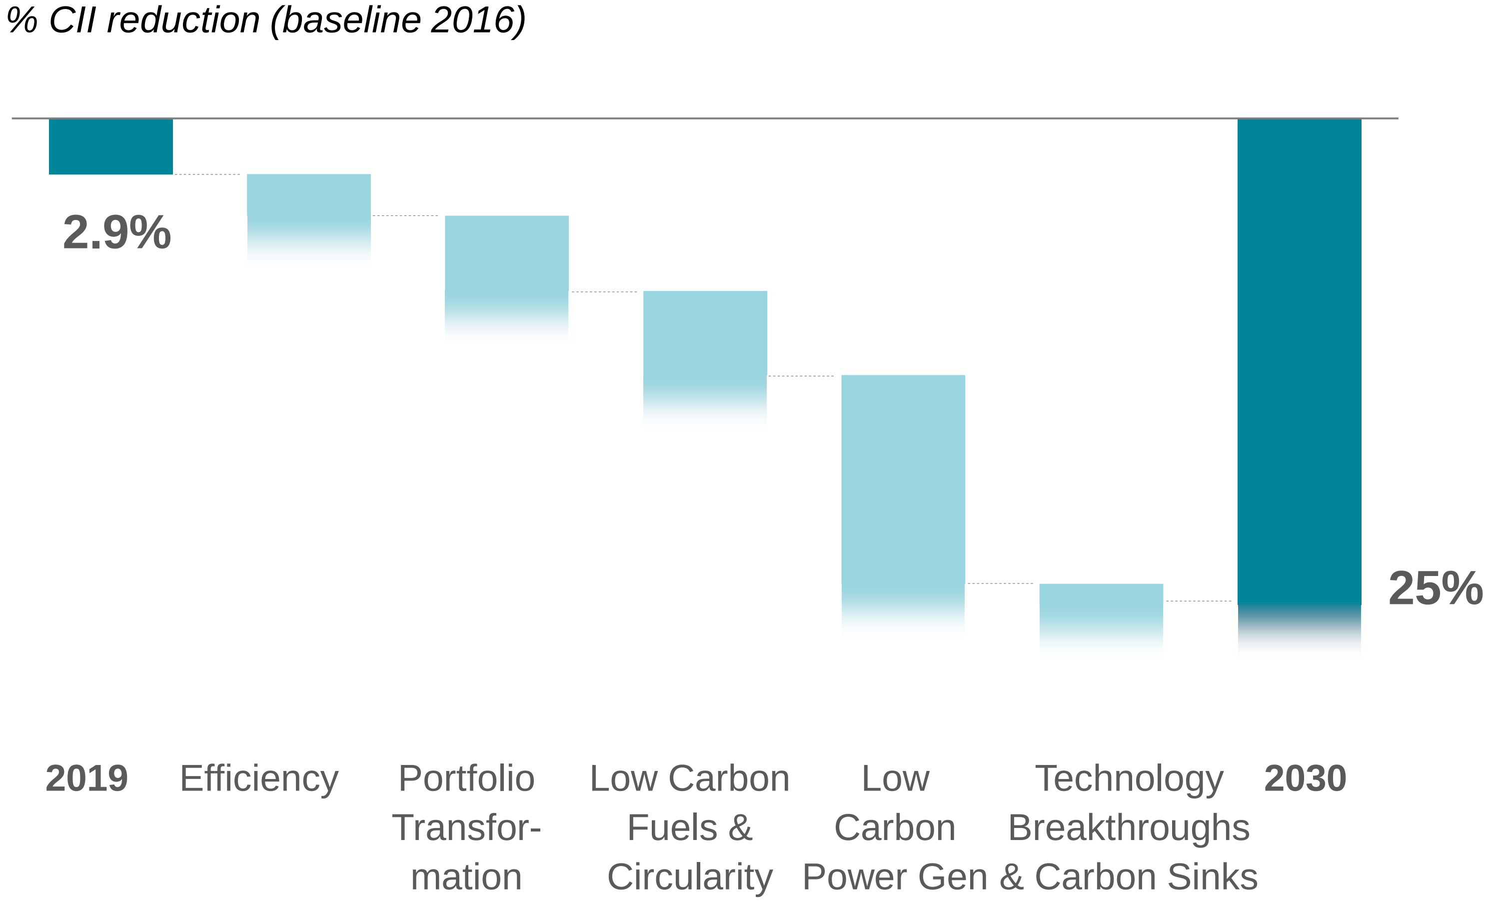


– **> 65% of biofuels produced from waste** by 2030 (up to 100% potentially to satisfy market or regulation demands)
– Large **availability of required feedstock with flexibility** between alternatives
– **~4 Mt of waste[3]** to be used as raw materials by 2030

1. Gross volumes 2. Expected capacity of sustainable biofuels by 2025 includes: 700 kt/y from current existing capacity, 250 kt/y capacity from the advanced biofuels plant in Cartagena, 130 kt/y capacity from a gasification plant to produce methanol and ~300 kt/y capacity through modifications in existing units. 3. Gross volume. It includes Repsol's whole circular strategy: biofuels, circular chemical products and plastics and biogas production

CII evolution: Repsol speeds up the transformation by increasing its carbon reduction targets from 20% to 25% by 2030

CII reduction breakdown by decarbonization lever



A clear decarbonization pathway towards net zero in 2050

Solid urban waste transformed into **methanol**

Capacity: **220,000 Tn/y**

Operational in 2025

Polyurethane foam recycling plant in Puertollano

Operational end-2022, with a capacity to treat **2,000 Tn/y** of waste

Renewable Hydrogen

0.4 GWeq by 2025
1.2 GWeq by 2030

Renewable hydrogen plant in Petronor

Renewable hydrogen plant in Petronor

Started engineering work

Advanced Mobility

Ambition >1,000 charging points Spain[2]

First ultra-fast charging point in Portugal

Continues expansion of recharging network in **Spain**

1 Recycle 20% equivalent of our polyolefin production by 2030. 2: Ambition of reaching more than 1.000 charging points in our Service Stations in Spain

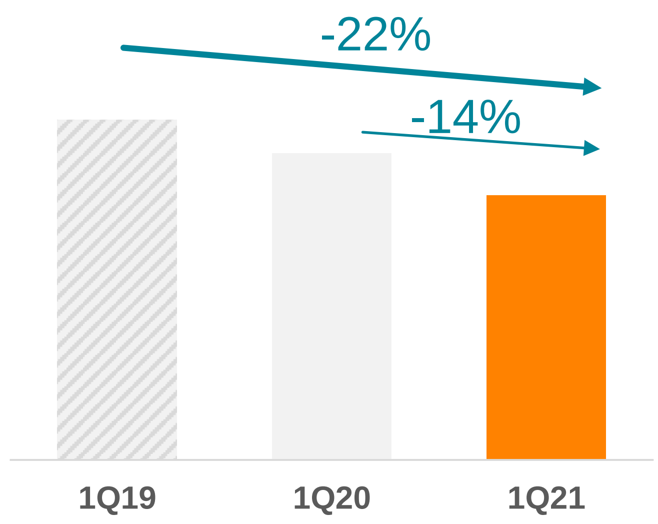
Mobility business impacted by COVID-19 and Filomena storm

Operational highlights - Commercial and Renewables

Mobility

- **Sales in Service Stations** -14% vs. 1Q20 and -22% vs.1Q19
- COVID-19 **mobility restrictions**
- **Filomena** storm **collapsed mobility and supply** for two weeks in Spain
- Divestment of Service Stations and direct fuels sales **businesses in Italy**

Sales in Repsol's Service Stations in Spain



Retail E&G

- Acquisition of **Gana Energía:** 100% green energy
- **> 1.2 Million** retail clients

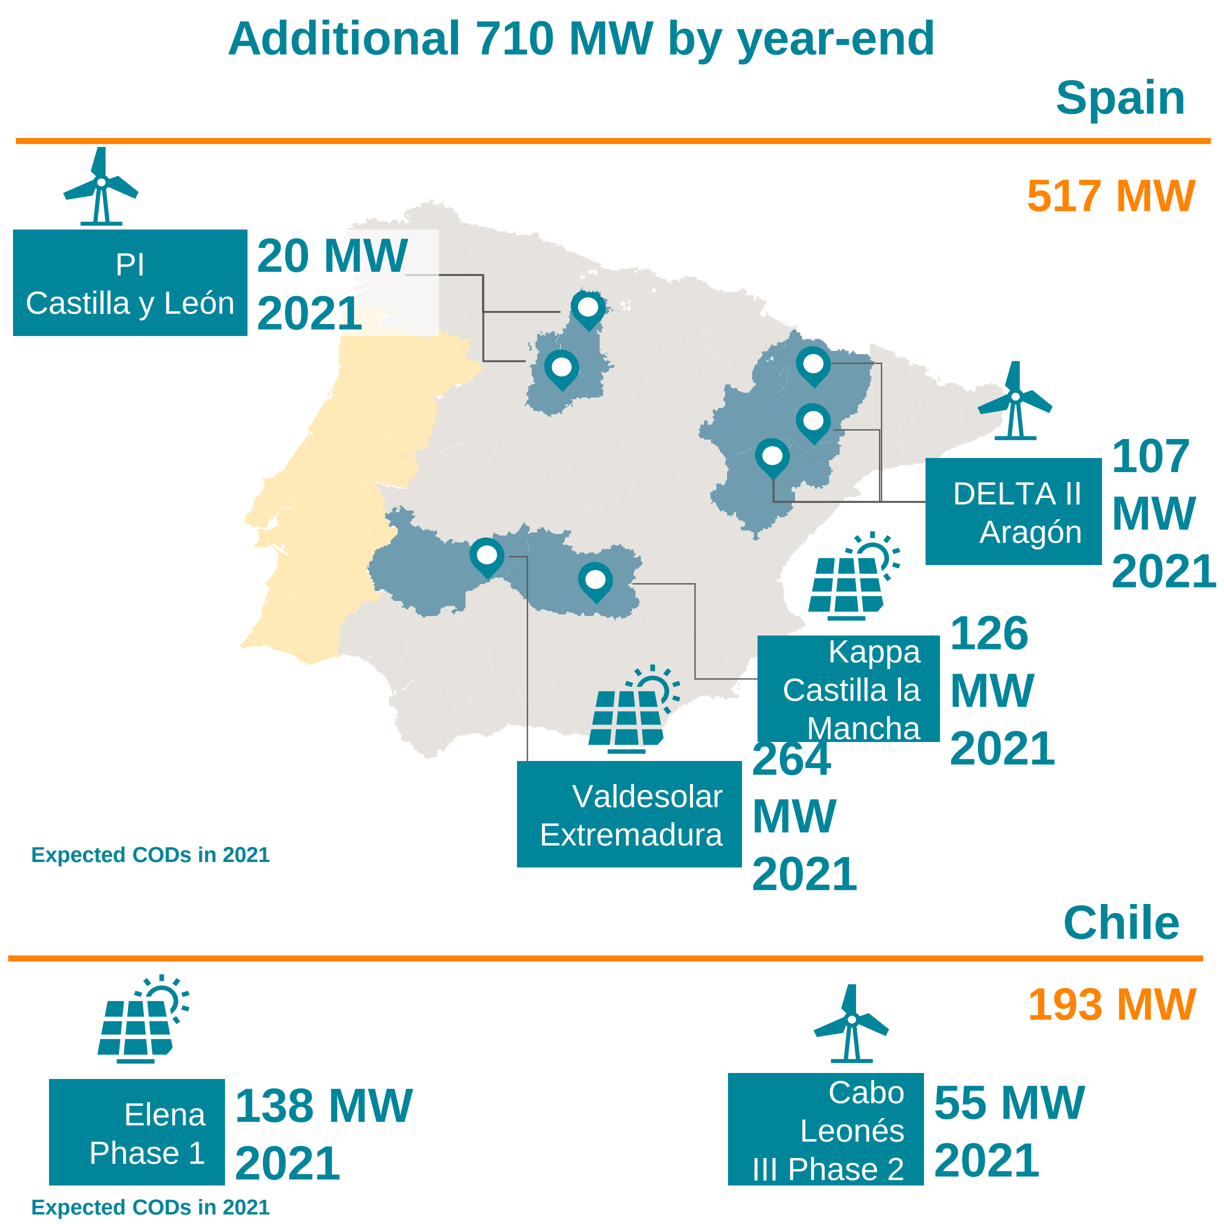
Lubricants, Asphalts and Specialties

- **Solid results**
- **Higher sales** vs. 1Q20 and **lower costs**
- Launched **new range lubricants for electric vehicles and motorcycles**

Renewables pipeline on track

Operational highlights - Commercial and Renewables

- **Electricity generated** by Repsol +**23% YoY**
- **Kappa**: first solar farm with 126 MW starting operations in April
- **Chile: 14-year PPA** for the development of Atacama wind project
- **PPA with Microsoft**



Higher oil & gas prices and stronger Chemicals to offset lower Refining

Outlook 2021

Production	~ 625 kboed	
Refining Margin Indicator	**$2 /bbl**	• vs. $3.5/bbl previous guidance
EBITDA CCS	~ **€5.8 Bn**	• +10% vs. previous guidance • >40% higher than in 2020
Capex	~ €2.6 Bn	• +10% Upstream FY Capex increase (unconventionals) • >25% deployed in Low Carbon platforms
Net debt*	≤ €6.8 Bn	• In line with 2020 (excl. hybrids transactions of 2021)
Dividend	€0.6 /share	• Dividend only in cash starting in July'21

Prudent capital allocation policy and revised macro scenario

* With leases

“Resilience mode” in an improving macro environment

Conclusions

Resilience of Repsol’s integrated model	• **1Q21 positive operating and free cash flow in all segments** • Upstream: “yield and focus” • Downstream: **Chemicals** and **Customer Centric** compensate Refining
Upstream ready to capitalize on higher prices	• **Strong 1Q21 organic FCF generation** • **Capex flexibility** in unconventionals (Marcellus, Eagle Ford) • **Exploration success** and **new FIDs** 2021/2022
Ongoing progress in the Energy Transition	• **Transformation of Industrial** assets • **Circular economy** opportunities • Development of **renewables pipeline** on track
Revised 2021 full-year EBITDA and CFFO targets	• **EBITDA CCS** target **upgraded +10% to €5.8 Bn** in 2021 • Higher O&G prices and stronger Chemicals to offset lower Refining
