~3% production growth in 2018 in line with commitment (2.6% CAGR by 2020)

Around 28 kboe/d of new production from short-cycle projects in 2018

- **Oil-biased new production** in Libya, Eagle Ford and Kinabalu
- **Incremental low cost production in gassy scale projects** as Sagari, Marcellus and Reggane

New opportunities: attractive pipeline in the Gulf of Mexico

Upstream

Buckskin First Oil (June 14th 2019)

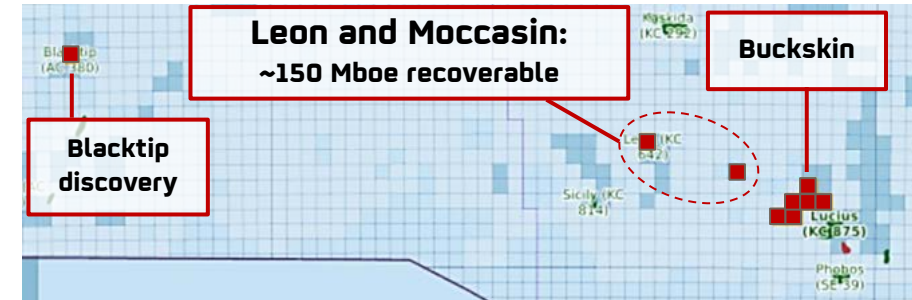

Last example of Repsol development strategy

- Key partner Llog aligned with Repsol **lean development**:
 - **Tie-back** to Lucius instead of a greenfield
 - **~40% Under FID (~75% under first estimations)**
 - Halving Breakeven since first estimation and -30% since FID
- Profitable **short-cycle**:
 - ~6 months ahead of Schedule
 - Phased approach
- High-grading portfolio → **High margin barrels**

Joint development of Leon and Moccasin

Growing the future

Strategic Alliance: Same operator, same approach application of Buckskin's successful model:

- **Low-cost, Fast-track**
- Standardization & constructability continuing improvement

New opportunities: Indonesia a value creation history

Upstream

Sakakemang: largest discovery in 18 years in Indonesia^[1]

- Repsol is **located in the best spot** to meet an increasing gas demand
- Top explorers in Indonesia; existing **remaining exploration portfolio around our core position** in order to continue growing if successful
- **Good margins** due to high gas realization prices

Indonesia new additional production

- **Sakakemang** KBD-2X's fast track development due to nearby facilities. **Anticipated FG in 2022**
- **Corridor extension**; first case for a IOC. Gross split contract **until 2043**
- Clear **synergies** between positions and exploration

Actual 2020 sustainable savings ~€500 million euros with CFFO impact

Digitalization and efficiency initiatives

Digitalization & efficiencies: Examples

Upstream

- **Integrated Operations Center (IOC)**

Integrated real-time control room identifying trends and anomalies over the medium term, improving safety, production and efficiency in its operations. Successfully tested in United Kingdom and Canada assets.

- **Integrated well center**

24/7 real-time support center for planning, execution and optimization of global Drilling & completion

Industrial

- **SICLOS**

Reach an operative excellence supported by the development of a new operational model based on economic criteria over the main operational parameters, allowing a continuous optimization, taking safety as main priority in order to achieve a sustainable margin improvement in the short-term.

- **Crude oil blending**

Optimize the crude scheduling process given complex refinery constraints to provide feasible blending scenarios for the next 30 days

Marketing

- **Offer Personalization in Service Stations**

Personalize pricing and promotions in Retail Stations to each client's preferences, profile and price sensitivity to maximize consumption and optimize net margin, maximizing client's engagement and loyalty. Omnichannel solution: points of sales, **Waylet** and mail.

Corporate

- **Robot Process Automation (RPA)**

Automatization to reduce the time spent on repetitive administration tasks in the Global Services department. By using robotic process automation, we have been able to automate processes such as the signing of contracts.

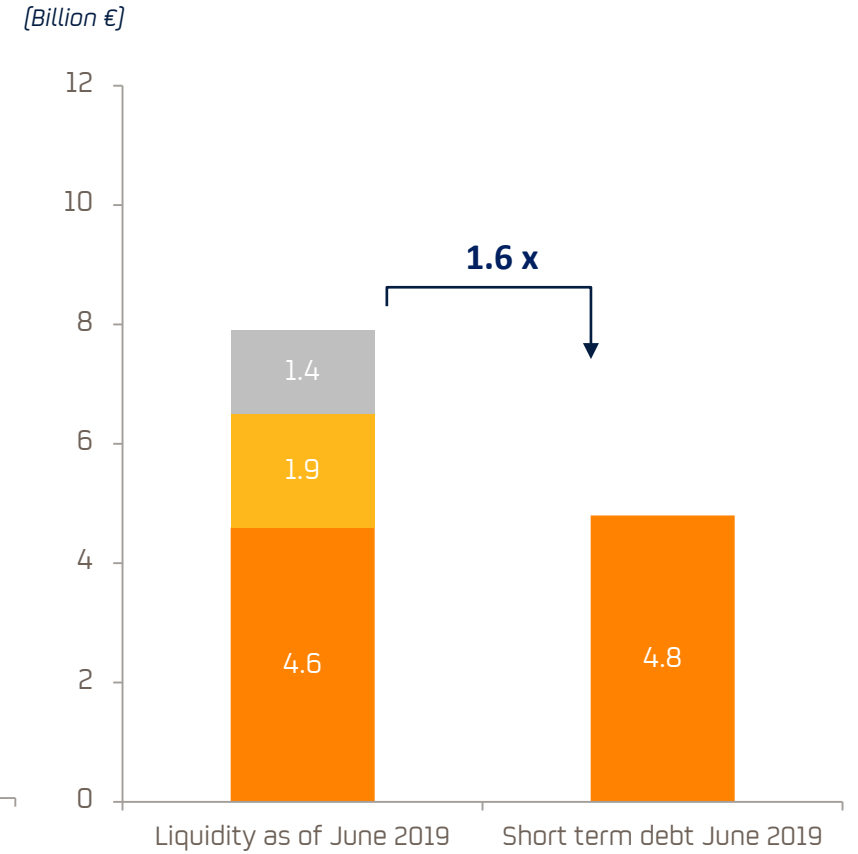

6

Financing
