

REDEPRINT S 15/25

VARNISH FOR INK

Description

Redeprint S 15/25 is a bituminous varnish designed for printing processes.

Applications

Redeprint S 15/25 varnish is designed for formulating inks that fulfil the strictest requirements with regard to printing technologies.

In addition, safety of handling is a determining factor in choosing this product.

Its carefully selected composition enables you to:

- Reduce the addition of pigments to black inks.
- Cut down on the consumption of other components such as resins.
- Have optimised thermal stability.

Redeprint S 15/25 varnish provides the flow and rheology needed to optimise behaviour in printing systems.

Available in

Bulk in tanks.

Technical Characteristics

	UNITY	METHOD	VALUE
Flash Point C.O.C.	°C	ASTM D-92	180 min.
Viscosity at 100 °C	cSt	ASTM D-445	130 - 170
Pour point	°C	ASTM D-97	18 max.

Unless otherwise indicated, the values presented in the technical data should be considered as typical values.
