

REPSOL AWARDED BEST POLYMER PRODUCER FOR EUROPE FOR FOUR CONSECUTIVE YEARS

- **Repsol awarded the Best producer of LDPE in Europe in 2019.**
- **Repsol thanks its customers for their continued recognition of their efforts to be their trusted supplier.**

Repsol has been awarded "Best polymer producer in Europe in 2019" during the annual European Plastics Converters (EuPC) gala held on June 13 in Berlin. This is the fourth time Repsol receives this award, granted by EuPC, the association that brings together the main transformers of European polymers.

Repsol proudly receives the award for "Best Low Density Polyethylene Producer" knowing that it is its customers who voted for it. Particularly relevant given that in the voting, customers in Europe have valued the performance of polymer producers in terms of product quality, compliance, reliability in delivery, communication and innovation.

Although it is the fourth consecutive year that Repsol receives this award, the company accepts it as an incentive to continue to surpass and offer the best value proposition to its customers. Repsol values its customers' trust during these successive years, becoming an incentive for the company to continue working on this line in the future.

This award once again reinforces Repsol's strategy to establish its customers as its most valuable asset.

NOTE TO THE EDITOR

Repsol is a global multi-energy company present throughout the value chain. It employs more than 25,000 people; its products are sold in more than 90 countries and reach 10 million customers. It produces over 700,000 barrels of oil equivalent per day and has one of the most efficient refining systems in Europe. It operates low-emission power generation assets and is developing renewable photovoltaic and offshore wind projects. The company is a pioneer in the development of mobility initiatives that contribute to innovative solutions and new energies for transportation.

Repsol manufactures and markets a wide variety of chemical products, ranging from basic petrochemicals to derivatives. In addition, the company has three large petrochemical facilities in Europe where high added-value differentiated products are developed.

The products from Repsol's Chemicals Division are used to manufacture everyday objects that improve people's quality of life, their well-being, and their safety.
