

High purity,
high quality

Repsol Propylene Glycols
for the cosmetics and personal care industry

Cosmetic and personal care

The products from Repsol's Chemicals Division are used to manufacture everyday articles which improve people's quality of life, wellbeing and safety.

Repsol offers:

- High quality products
- Excellent logistic service
- Technical Service and Development

Repsol manufactures a wide array of propylene glycols. It is with a strict monitoring of quality and safe handling, from production to delivery, that we offer you a high standard quality product:

- **MPG USP/EP Monopropylene Glycol**
- **DPG PER Dipropylene Glycol**

High purity, high quality

Propylene Glycol (PG) USP/EP produced and commercialised by Repsol, is manufactured using exclusively propylene oxide and water as raw materials with a purity higher than 99.8 %

Glycol: highly valued for its **excellent properties**

- It is used in more than 4,000 cosmetic products
- Keeps moisture in creams
- Provides lipstick with its consistent texture
- Preserves the homogenous constituency of body lotions
- Keeps fragrance of perfumes
- Ensures that shampoos foam nicely

Glycols, due to their ideal properties and qualities, **are present in a large number of applications**

- Face creams, deodorant-sticks, body lotions, lipsticks
- Personal care products as a fragrances and deodorants, perfums, face make-up, nail polish, soaps, shaving and skin care products
- Oral care, mouthwashes, toothpaste
- Hair care
